MEDICAL WEBSITE · EGYPT

MedMind

Your Health • Our Priority

Check on your health with an AI assistant, learn about diseases, and find and book a doctor or hospital, without leaving home.

01 · WHY People get sick and don't know what to do.

THE PROBLEM المشكلة

Sick, and not sure what to do

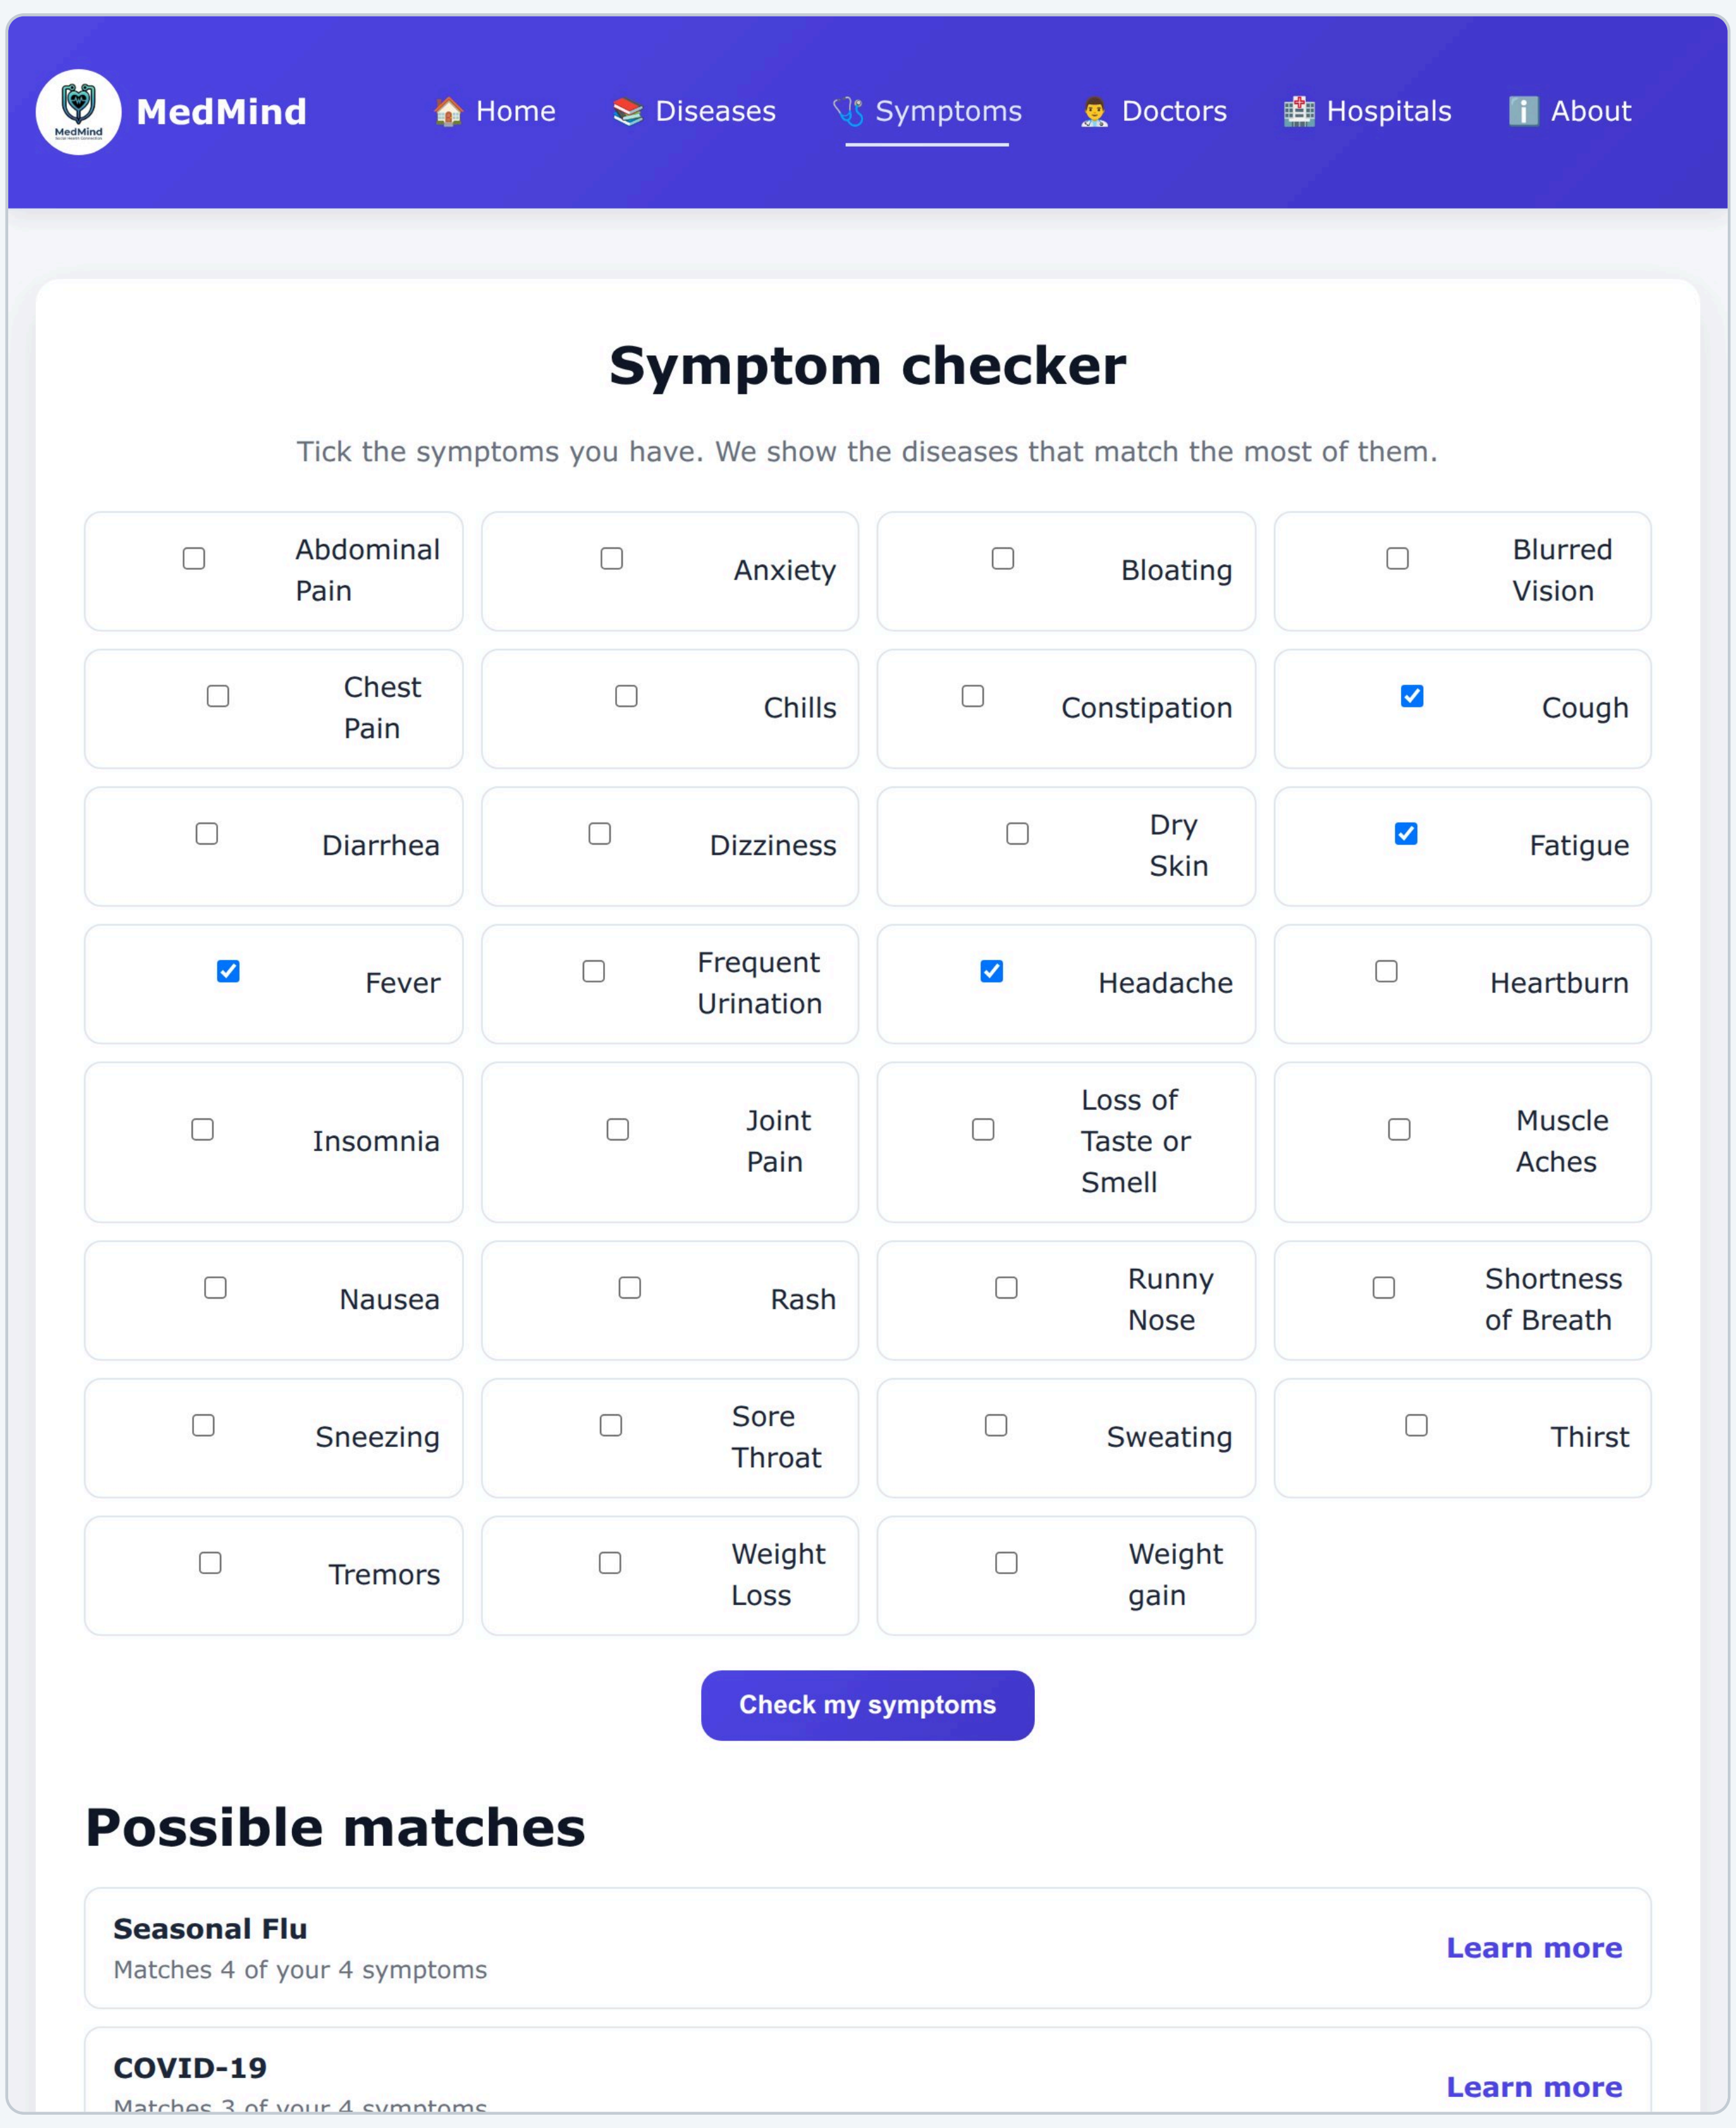
Many people feel unwell and can't tell if it is serious. They go to a doctor, lose time and money, and often don't know which specialty they needed.

OUR SOLUTION الحل

Check, learn, then book

MedMind lets people check their symptoms, read about diseases and ask an AI assistant, then book the right doctor or hospital online.

02 · SEE IT From a symptom to a booking. من العَرَض إلى الموعد



Symptom checker

Tick the symptoms you have. We show the diseases that match the most of them.

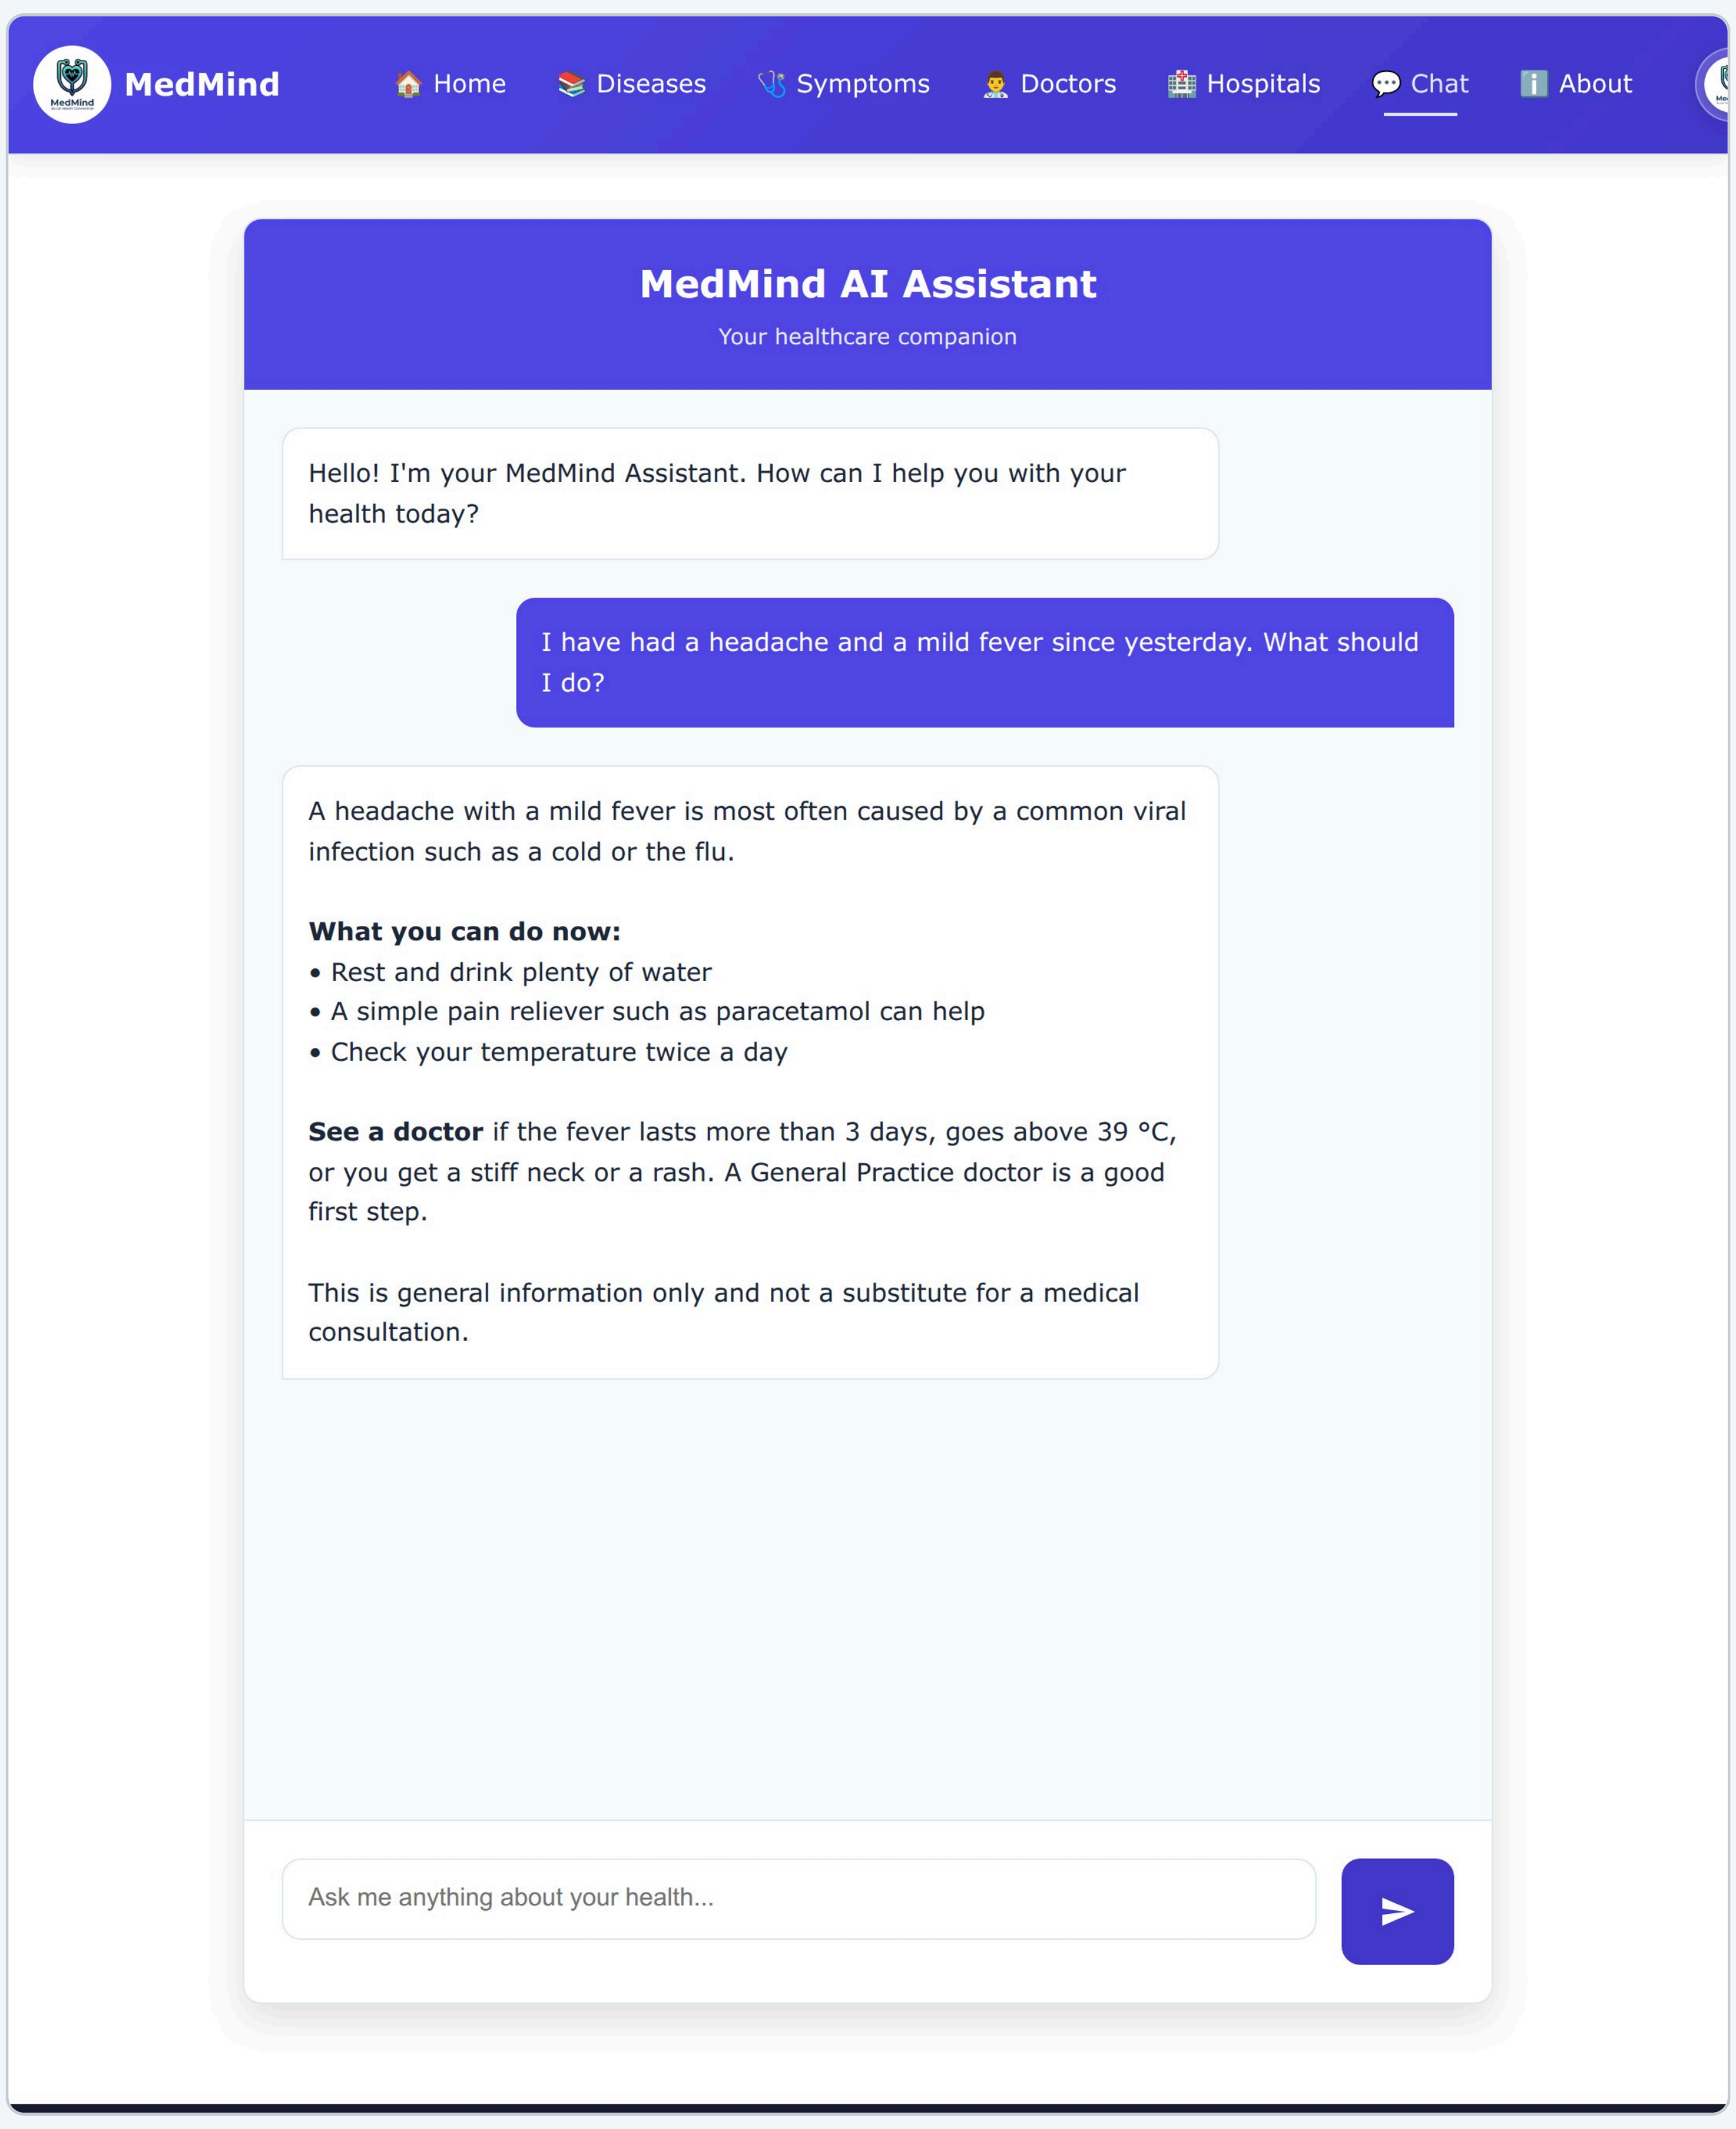
☐ Abdominal Pain	☐ Anxiety	☐ Bloating	☐ Blurred Vision
☐ Chest Pain	☐ Chills	☐ Constipation	☑ Cough
☐ Diarrhea	☐ Dizziness	☐ Dry Skin	☑ Fatigue
☑ Fever	☐ Frequent Urination	☑ Headache	☐ Heartburn
☐ Insomnia	☐ Joint Pain	☐ Loss of Taste or Smell	☐ Muscle Aches
☐ Nausea	☐ Rash	☐ Runny Nose	☐ Shortness of Breath
☐ Sneezing	☐ Sore Throat	☐ Sweating	☐ Thirst
☐ Tremors	☐ Weight Loss	☐ Weight gain	

Possible matches

Seasonal Flu
Matches 4 of your 4 symptoms

COVID-19
Matches 3 of your 4 symptoms

Symptom checker: four symptoms ticked (cough, fatigue, fever, headache). Seasonal Flu has all 4, so it comes first, then COVID-19 with 3.



MedMind AI Assistant
Your healthcare companion

Hello! I'm your MedMind Assistant. How can I help you with your health today?

I have had a headache and a mild fever since yesterday. What should I do?

A headache with a mild fever is most often caused by a common viral infection such as a cold or the flu.

What you can do now:
- Rest and drink plenty of water
- A simple pain reliever such as paracetamol can help
- Check your temperature twice a day

See a doctor if the fever lasts more than 3 days, goes above 39 °C, or you get a stiff neck or a rash. A General Practice doctor is a good first step.

This is general information only and not a substitute for a medical consultation.

Ask me anything about your health...

AI chat: a signed-in patient asks about a headache and a mild fever. Gemini answers in plain words and says when to see a doctor.

- **A disease library**
  20 diseases, each with an overview, a treatment and its symptoms.
- **A symptom checker**
  Tick any of 31 symptoms. Diseases come back ranked by how many match.
- **Doctors and hospitals**
  15 doctors in 15 specialties and 10 hospitals, with place and fee.
- **Book in one step**
  Patients pick a date and time. The doctor or hospital confirms it.
- **An AI assistant**
  Signed-in users ask Gemini in their own words, up to 1000 characters.
- **Admin tools**
  Approve or reject new doctors and hospitals. Add, edit and delete diseases and symptoms.

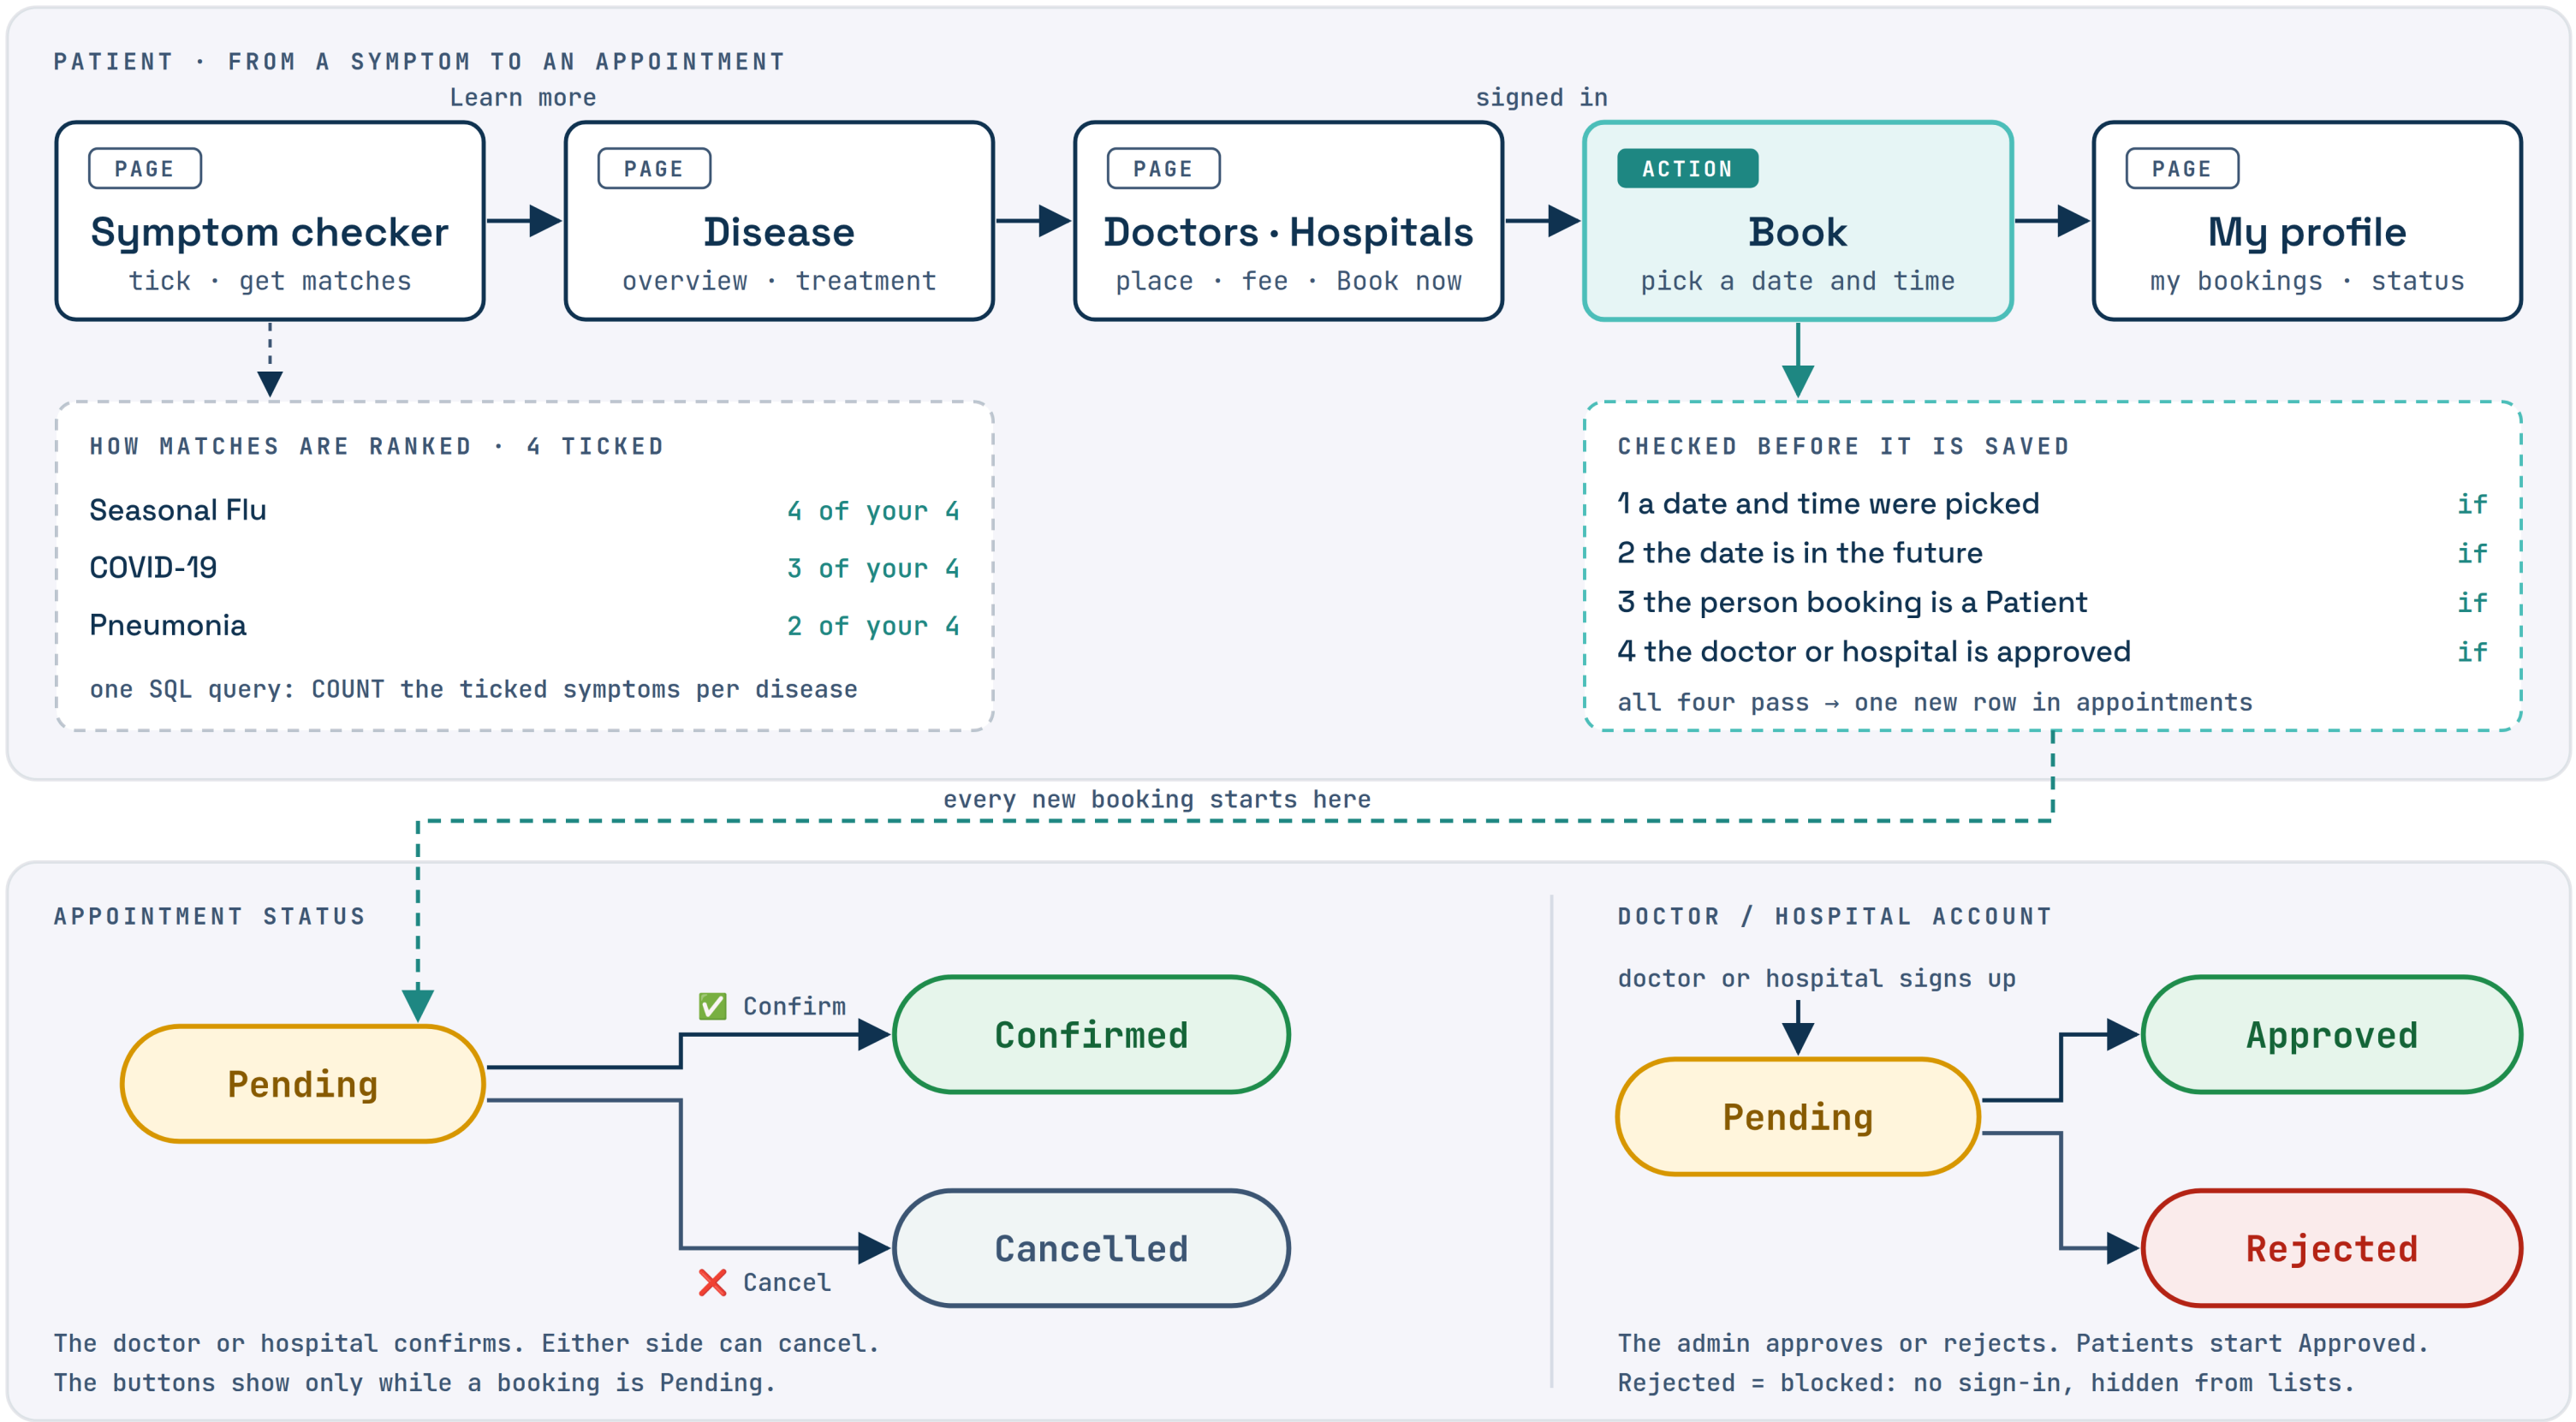
HOW A BOOKING MOVES



PATIENT · FROM A SYMPTOM TO AN APPOINTMENT

PAGE **Symptom checker** tick · get matches → (Learn more) → PAGE **Disease** overview · treatment → PAGE **Doctors · Hospitals** place · fee · Book now → (signed in) → ACTION **Book** pick a date and time → PAGE **My profile** my bookings · status

HOW MATCHES ARE RANKED · 4 TICKED

Seasonal Flu	4 of your 4
COVID-19	3 of your 4
Pneumonia	2 of your 4

one SQL query: COUNT the ticked symptoms per disease

CHECKED BEFORE IT IS SAVED

1 a date and time were picked — if
2 the date is in the future — if
3 the person booking is a Patient — if
4 the doctor or hospital is approved — if

all four pass → one new row in appointments

every new booking starts here

APPOINTMENT STATUS

Pending → ✅ Confirm → Confirmed
Pending → ❌ Cancel → Cancelled

The doctor or hospital confirms. Either side can cancel.
The buttons show only while a booking is Pending.

DOCTOR / HOSPITAL ACCOUNT

doctor or hospital signs up → Pending → Approved / Rejected

The admin approves or rejects. Patients start Approved.
Rejected = blocked: no sign-in, hidden from lists.
