PYGAME ZERO · RACING GAME

# TURBO

## Race smart. Drive safe.

Dodge traffic on six roads, collect coins for new cars, and learn a real road sign every time you crash.

01 · THE PROBLEM المشكلة

# Road safety matters, but learning it is boring.

### Signs are easy to forget

There are dozens of road signs, and a list in a book is forgotten after the test.

### Games teach the wrong thing

Most racing games reward speed and crashes, with no lesson about driving safely.

### Danger starts young

Children walk, cycle and ride in cars near busy roads every day, long before they drive.

WHO IT'S FOR لمن هذا التطبيق

# Young players, and the people who teach them.

01

## Kids aged 8 to 14

A fast, fun game in short rounds, with coins and cars to unlock.

02

## Teens who will drive soon

To know what each sign means before they ever sit behind the wheel.

03

## Teachers and schools

A fun way to start a road-safety lesson: one race, one sign to talk about.

04

## Parents

Screen time that teaches something useful, with no ads and no internet.

OUR SOLUTION الحل

# Dodge. Collect. Upgrade.

**1**

## Dodge

Steer with ← → across 6 lanes of traffic. You have 3 hearts.

→

**2**

## Collect

A point every half second, and a coin to grab every 2.3 seconds.

→

**3**

## Upgrade

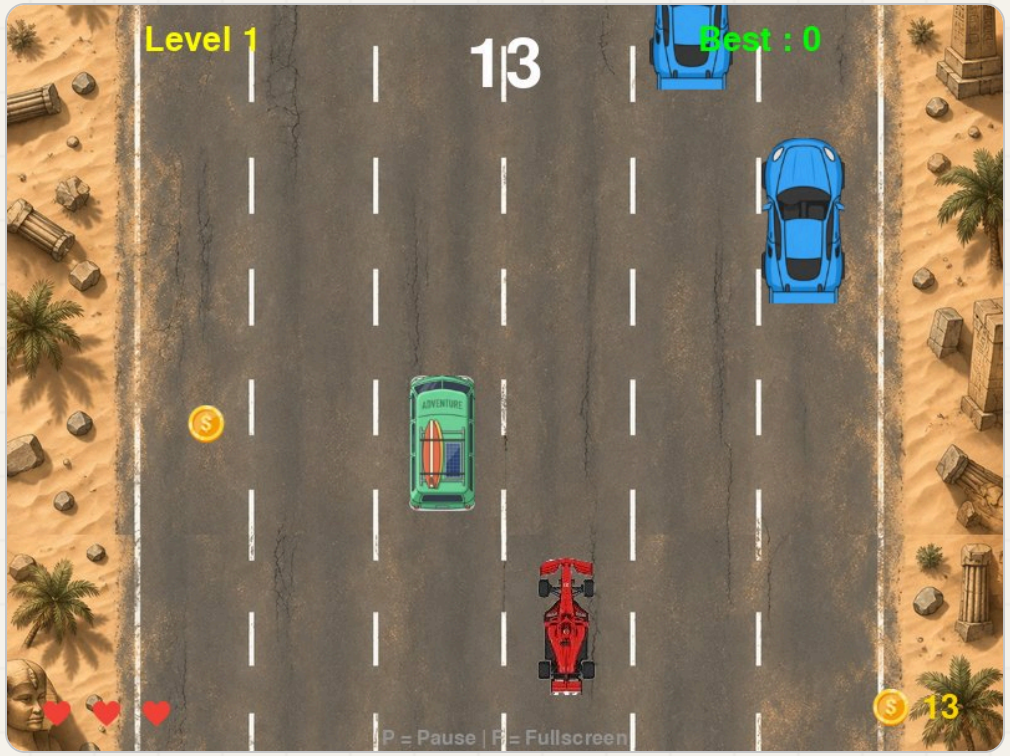

Spend coins in the car shop: 9 cars, from free to 50 coins.

02 · DEMO عرض

# Press SPACE and race.

Start: the logo over the Egypt road, with home, shop and makers buttons.

Level 1: score in the middle, level and best score on top, hearts and coins below.

02 · DEMO عرض

# Spend your coins.

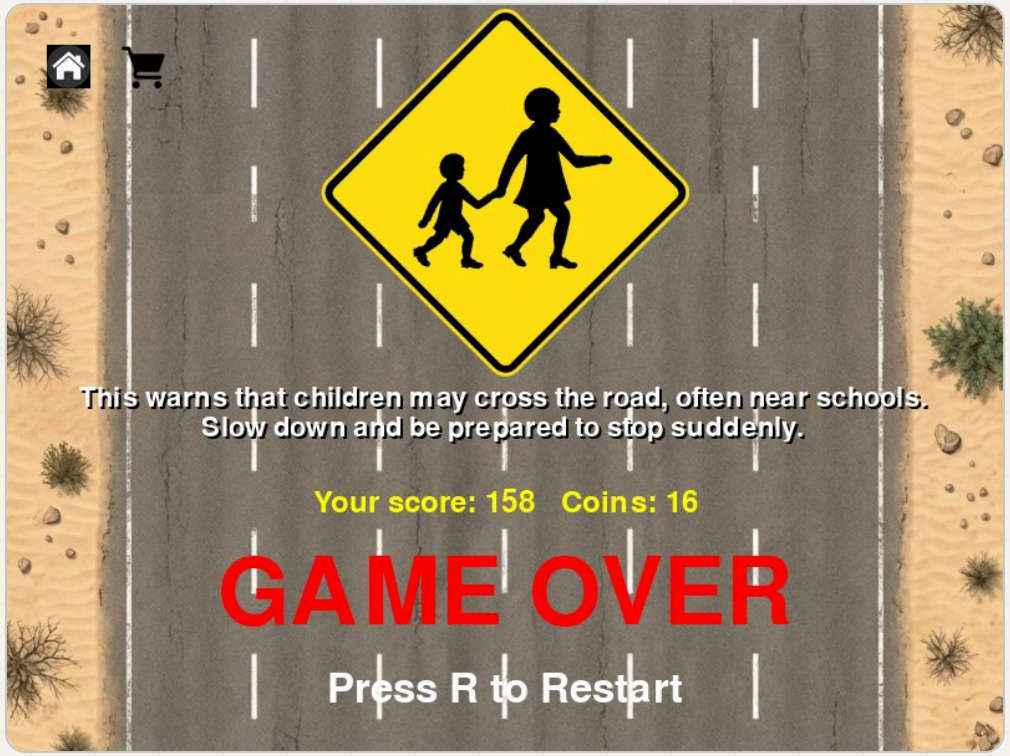

- **Nine cars**
  Buggy, Ferrari, Formula 1, pickup, moto and more.
- **Buy once**
  Prices go from 5 to 50 coins. A car you own says SELECT.
- **Equip it**
  Its card turns green, and it is your car from now on.
- **Coins carry over**
  From one race to the next, while the game is open.

# Pause, crash, learn.

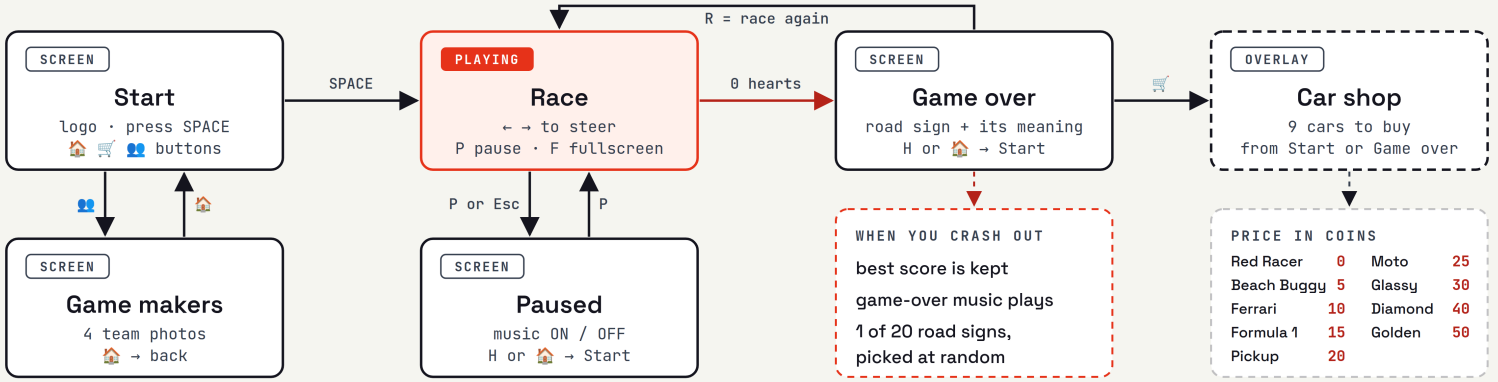

Paused: P or Esc stops the race. Click the speaker to turn the music on or off.

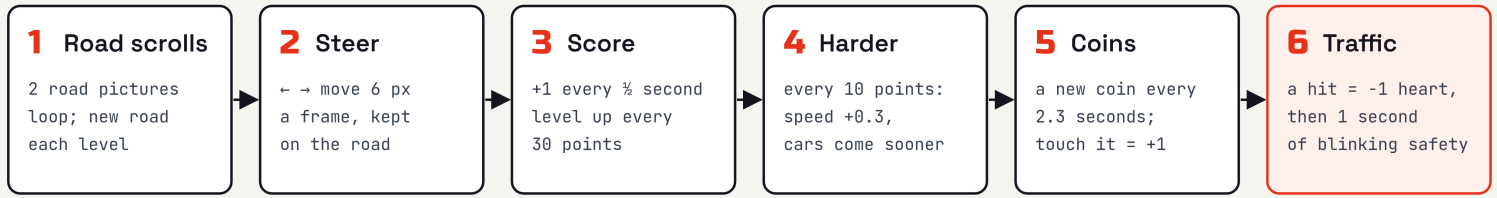

Game over: 1 of 20 road signs and what it means. R races again.

# Sixty frames a second.

SCREENS · CHOSEN BY TRUE/FALSE FLAGS IN GAME.PY AND THE HEARTS LEFT

EVERY FRAME OF A RACE · update() IN PLAY_PAGE.PY, 60 TIMES A SECOND

3 hearts at the start. When the last heart is gone, update() stops moving things and the Game over screen takes over.
Speeds are multiplied by the frame time, so the race runs the same on a slow or a fast computer.

**6** screens: start, race, pause, game over, shop, makers

**0.5** second for each point you score

**3** hearts, and 1 second of safety after each crash

# Seven files, one game.

WHY THE NAME سر الاسم

# TURBO

A turbo is the part of an engine that pushes a car to go faster, and every racing fan knows the word. The logo shows three racing cars on a road under checkered flags, with flames and a speedometer for speed. The name promises a fast, fun game, while the game quietly teaches the rules that keep real drivers safe.

# Thank you.
