REAL ESTATE · EGYPT

EMLAK HUB

Your next home, one click away

Search for a home to buy or rent, see every detail, and sign the contract online.

Property information is hard to reach.

Hard to find

Getting property information in an organized, fast way is difficult.

Slow to follow up

After finding a home, the client still has to read the details and follow steps like the contract.

Hard to show a home

Owners need a platform to present their property easily, without complications.

WHO IT'S FOR لمن هذا التطبيق

For home seekers and home owners.

01

Buyers, renters and home seekers

Homes for sale or rent, with full details: price, address, rooms and area.

02

Property owners and landlords

A simple way to publish their properties.

03

Real-estate agents

A digital tool to manage listings and contracts.

04

Students exploring digital property tools

A practical example of digital transformation in real estate.

OUR SOLUTION الحل

Find. Sign. Get the keys.

1

Find

Search and filter the gallery, then open a home to see its photos and price.

→

2

Sign

Download the ownership or tenant contract, sign it, and upload the PDF.

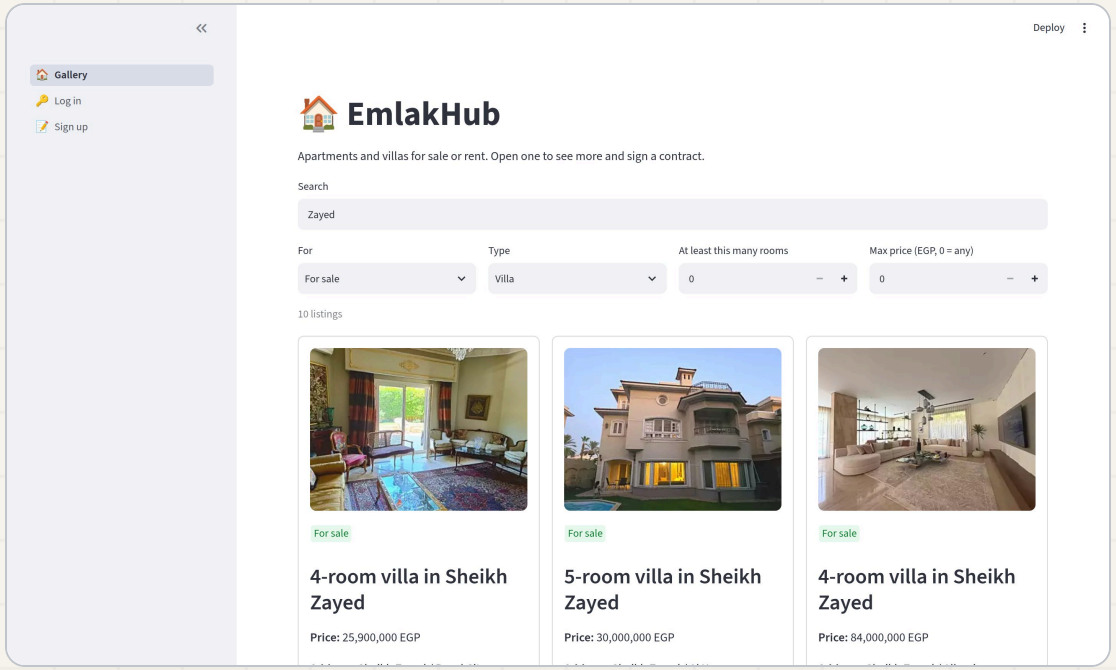

→

3

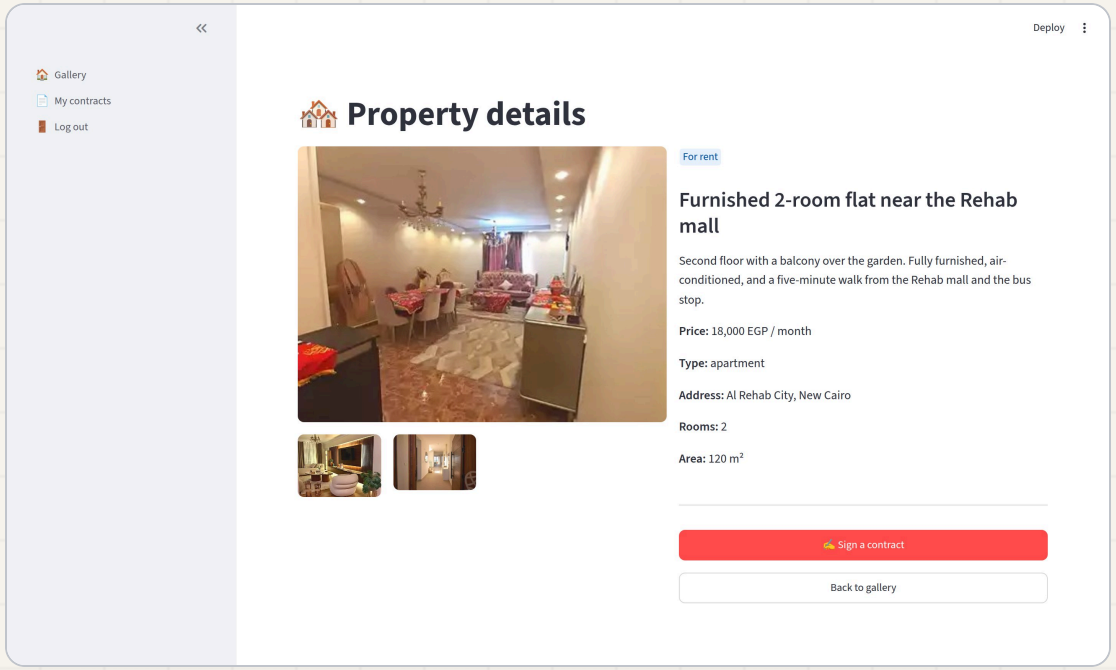

Approved

The admin says yes, and the home is marked SOLD or RENTED.

Find a home.

Gallery: villas for sale in Sheikh Zayed, with the search box and four filters.

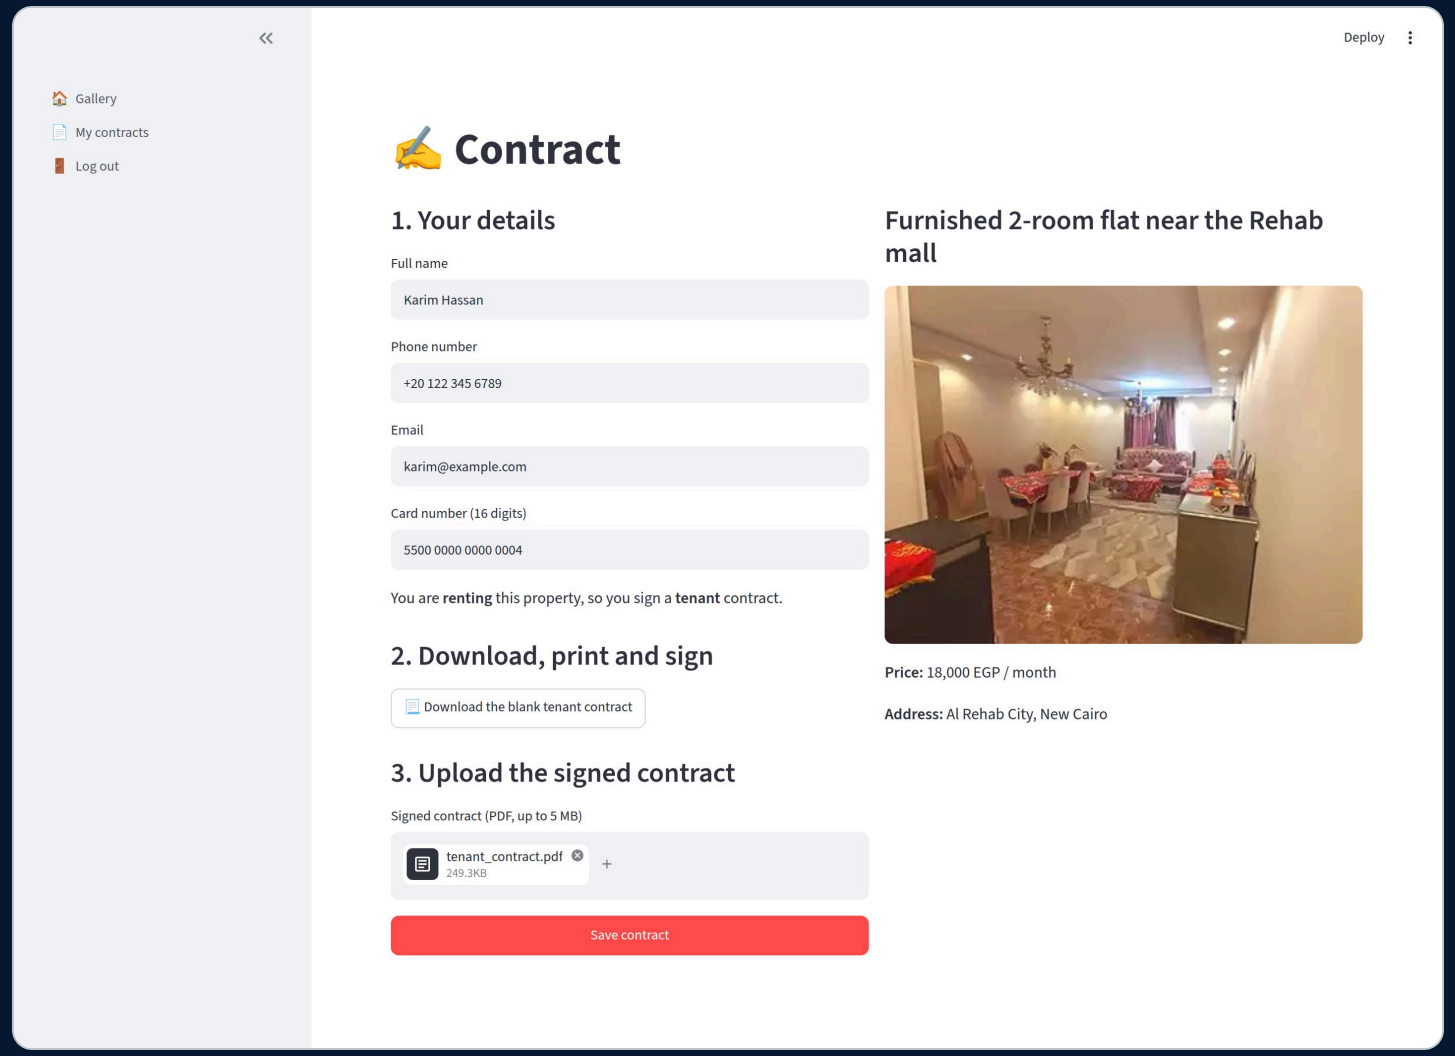

Details: a furnished flat for rent, its photos, and the price per month.

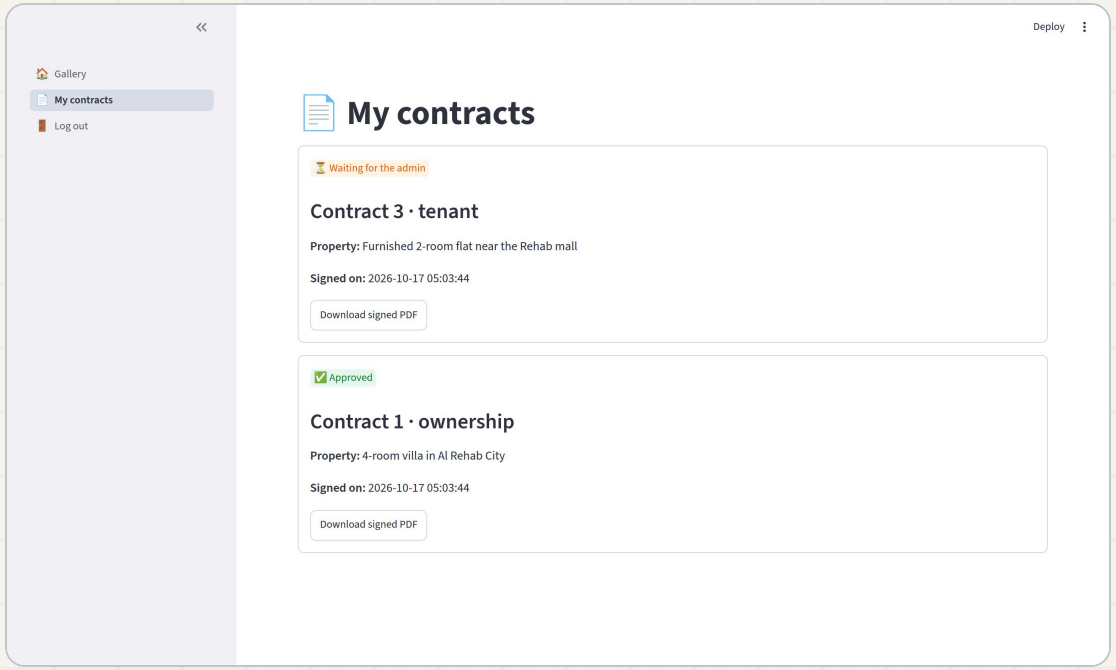

02 · DEMO عرض

Sign on one page.

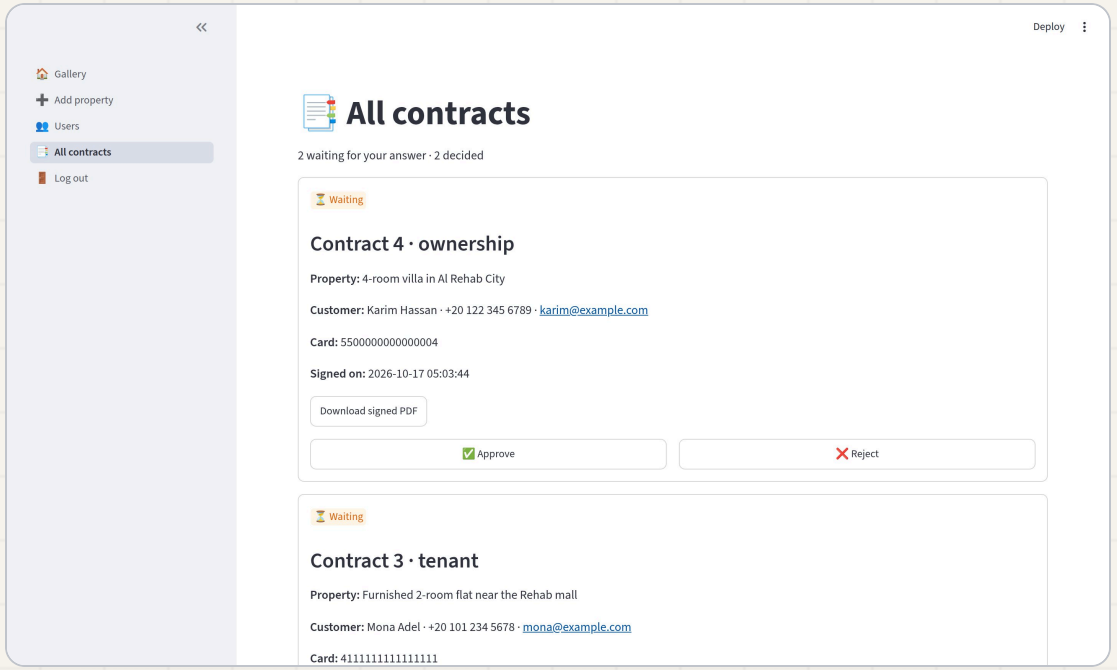

- **Your details, filled in**
  Name, phone and email come from your account.
- **The right contract**
  For sale: ownership. For rent: tenant.
- **Sign and upload**
  One PDF, up to 5 MB, saved under the contract's number.
- **One at a time**
  While you wait for an answer, you can't sign for the same home again.

Wait for the answer.

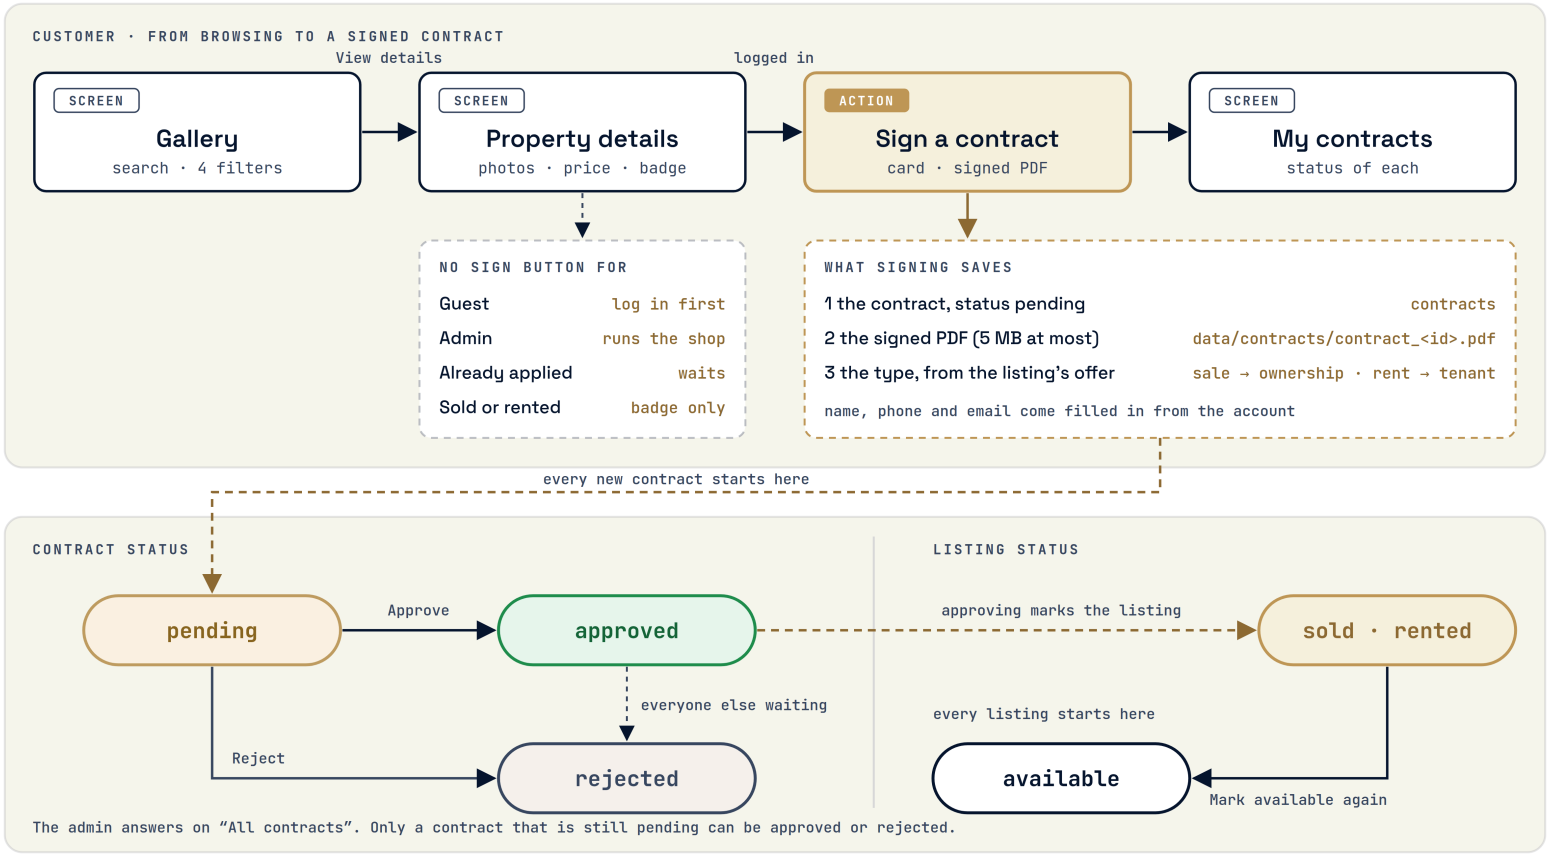

My contracts: one waiting, one approved.

All contracts: the admin sees who is waiting and presses Approve or Reject.

One yes, and the home is taken.

3 contract steps: pending, approved, rejected

1 approval turns down everyone else waiting for that home

5 photos per home at most, 5 MB each

Built so a beginner can read every line.

HOW THE MENU IS BUILT

EVERY RERUN

app.py runs first

Before any screen, every single time.

↓

SESSION

Who is logged in?

st.session_state.user
None, or the users row (is_admin 0 or 1)

↓

ST.NAVIGATION

Only allowed pages go in

A page that is not in the list cannot be opened at all.

> Hide what you can't use, instead of showing it and saying no. Pages marked "hidden" are in the list but not in the menu: a button opens them.
