Legion

Care, made clearer.

See your health signals in one calm place, ask the AI care agent how you feel, and give your care team the context they need.

01 · WHY Health data should lead to better care.

THE PROBLEM المشكلة

Data in many places

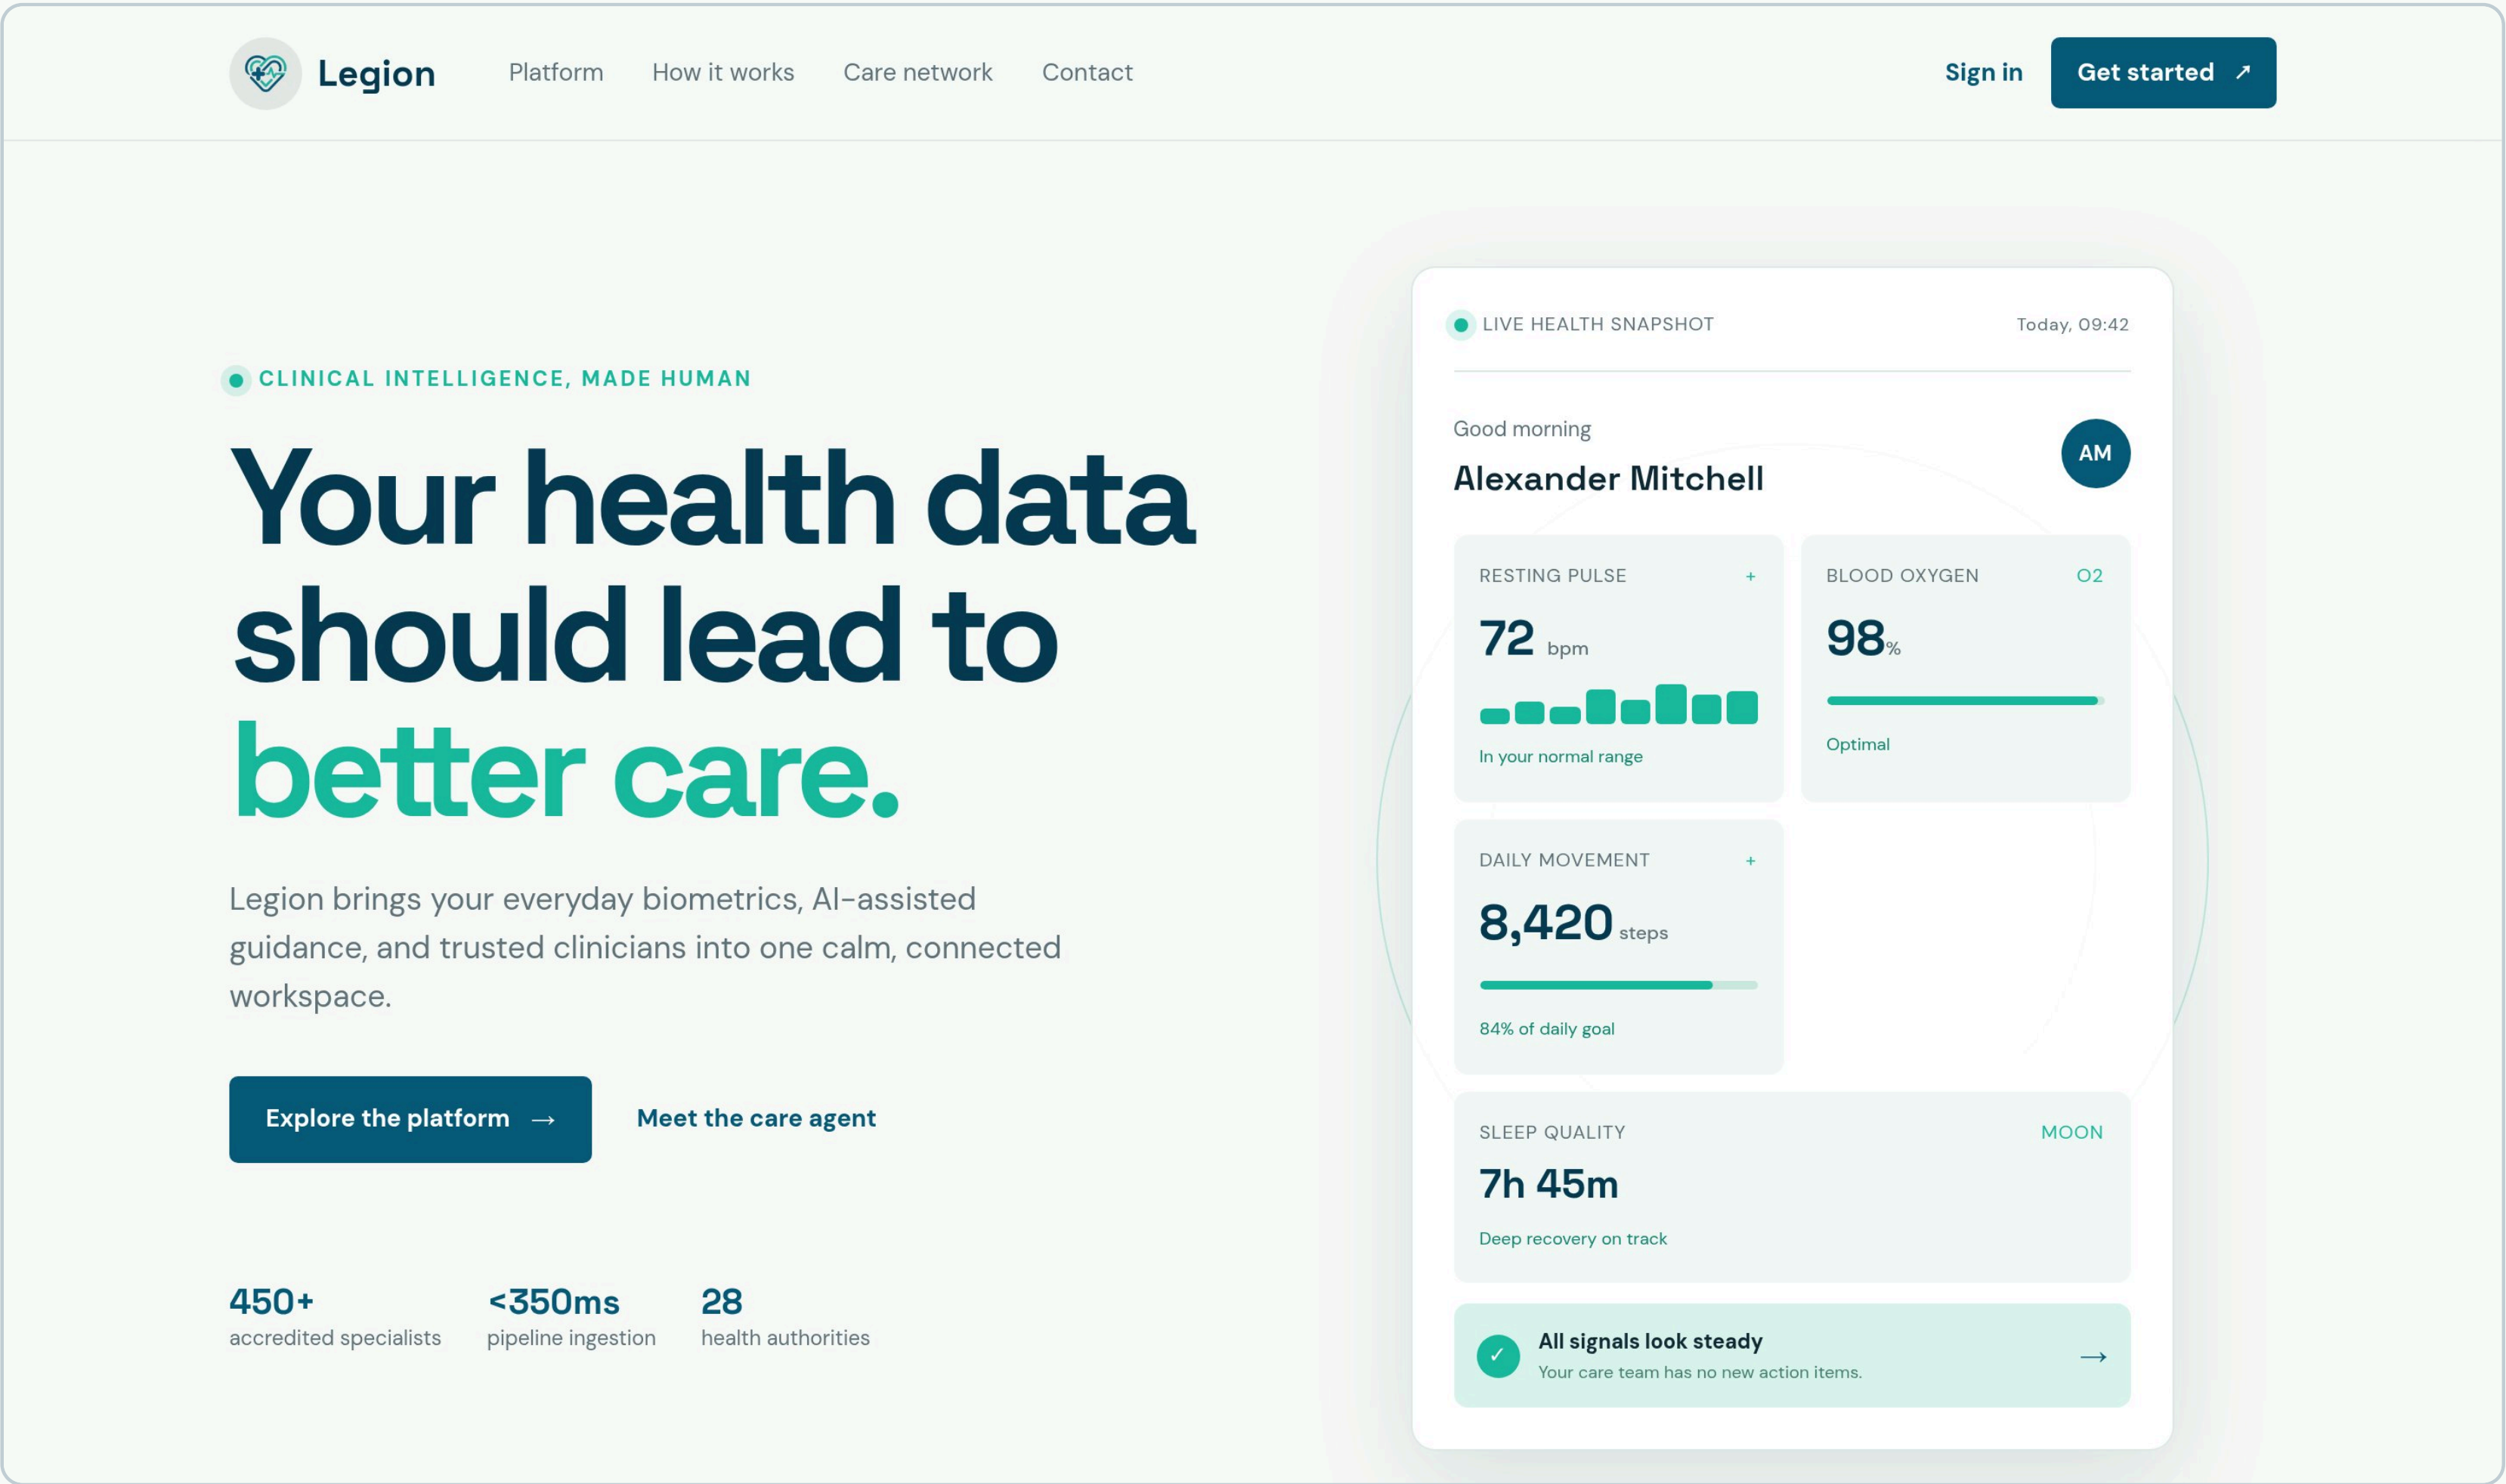
Pulse, sleep, steps and oxygen live in different apps and records. Patients struggle to see the whole picture, and clinicians start every visit without context.

OUR SOLUTION الحل

One connected picture

Legion brings biometrics, AI-assisted guidance and care teams into one workspace. You see clear trends, and your clinicians get a focused summary before the conversation starts.

02 · SEE IT From signals to care. من الإشارات إلى الرعاية



Legion Platform How it works Care network Contact Sign in Get started ↗

CLINICAL INTELLIGENCE, MADE HUMAN

Your health data should lead to better care.

Legion brings your everyday biometrics, AI-assisted guidance, and trusted clinicians into one calm, connected workspace.

Explore the platform → Meet the care agent

450+ accredited specialists
<350ms pipeline ingestion
28 health authorities

LIVE HEALTH SNAPSHOT Today, 09:42
Good morning
Alexander Mitchell AM
RESTING PULSE 72 bpm In your normal range
BLOOD OXYGEN O2 98% Optimal
DAILY MOVEMENT 8,420 steps 84% of daily goal
SLEEP QUALITY MOON 7h 45m Deep recovery on track
All signals look steady
Your care team has no new action items.

Home: the headline, three short facts, and a sample health dashboard with pulse, oxygen, steps and sleep.

- **A health dashboard**
  A sample card with pulse, oxygen, steps and sleep.
- **A platform page**
  Three feature cards, a calm workflow and care-network numbers.
- **An AI care agent**
  Describe how you feel in a chat and get a note that it was received.
- **A contact form**
  Name, email and message, with a thank-you note.
- **Sign in and register**
  Forms with a Show/Hide password button.
- **Works on a phone**
  A Menu button opens the links on small screens.

THE PLATFORM

One clear view of your health.

Legion turns disconnected signals into a living, useful picture for you and your care team.

01 Biometric timeline
Bring together wearable, glucose, sleep, and activity data in a single timeline that makes meaningful patterns visible.

02 Clinical context
Give clinicians the trend lines, symptoms, and history they need before the conversation starts.

03 Secure by design
Your data is protected with encrypted transport, role-based access, and an audit trail built for healthcare.

Platform: what Legion does.

AI-ASSISTED CARE

A better first conversation.

Tell Legion how you feel in your own words. The care agent organizes the details and helps you choose the next step.

Legion care agent
Clinical context assistant
Online

Hello, Alexander. What would you like help understanding today?
09:41 AM

I felt a flutter in my chest after my run. It has settled now.
09:42 AM

WHAT IT DOES

Context, not conclusions.

The agent helps you express symptoms clearly and prepares useful context for a qualified clinician. It does not diagnose emergencies.

AI agent: a chat demo.

EVERY PAGE HAS ITS OWN COPY OF

The header: logo, menu, Sign in	`.site-header`
The phone “Menu” button	`.is-open`
The look: all colours in one place	`styles.css :root`
The footer	`.site-footer`
The behaviour: one file for all pages	`script.js`

CHAT

✍ You type `#chat-input`
➡ Send `submit`
💬 Message `#chat-status`
no real agent answers

WHEN YOU PRESS SEND (script.js)

1 keep the page from reloading	`preventDefault()`
2 clear the box (contact, chat)	`reset()`
3 write a friendly message	`textContent`
4 save or send anything	`nothing`

Every form on the site is a demo.

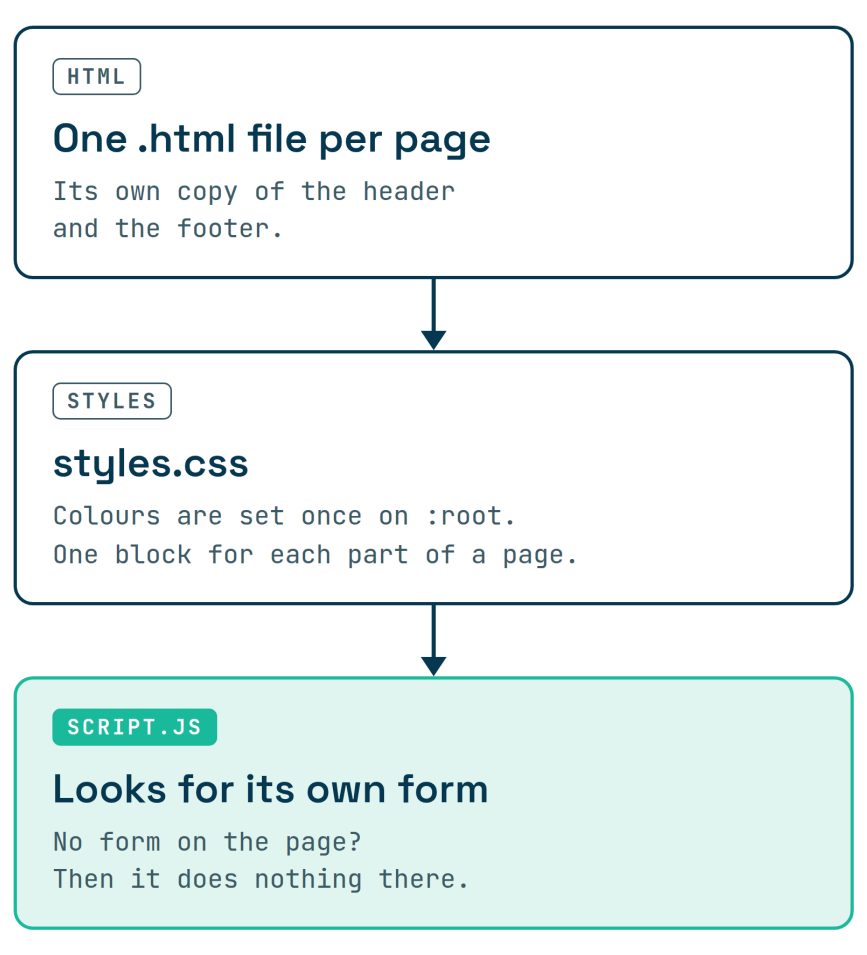
A FORM, STEP BY STEP

The message appears under the form. Nothing is saved anywhere.

The browser checks the boxes first (required, email, 8-letter password). Only a good form reaches script.js.

HOW EVERY PAGE IS BUILT

HOW EVERY PAGE IS BUILT



One .html file per page
Its own copy of the header and the footer.

styles.css
Colours are set once on :root. One block for each part of a page.

Looks for its own form
No form on the page? Then it does nothing there.

Copying the header and footer is on purpose: every file can be read from top to bottom on its own.

WHICH PAGE HAS WHICH PART

Page	Menu header with links	Form	Message appears in
MARKETING PAGES			
🏠 Home	✓	contact form	#form-status
🧩 Platform	✓	—	—
💬 AI agent	✓	chat form	#chat-status
✉ Contact	✓	contact form	#form-status
ACCOUNT PAGES · SHORT HEADER			
🔐 Sign in	—	login form + Show/Hide	#login-status
📝 Register	—	register form	#register-status

Sign in and Register have a short header (logo and two buttons), so they have no phone menu. 6 pages, 4 demo forms, 1 shared script.

0
libraries to install: just HTML, CSS and JavaScript

6
pages, one .html file for each

4
demo forms: sign in, register, contact and chat

53
lines in the one script that every page shares

BUILT WITH
`HTML` `CSS` `JavaScript`
