Vivestand: Sports Injury Recovery Platform

Project documentation for the Afro-Asian Forum for Innovation and Technology (AFFIAT), Aswan Finals 2026 · Logien Mohamed · Team Vivestand · Techno Future Academy, KFS

1. Project Overview | نظرة عامة على المشروع

Field	Value
Project Title	Vivestand: Sports Injury Recovery Platform
Project Type	Static website (front-end demo, no server)
Description	Vivestand is a website for athletes who got hurt. Pick your injury and get a recovery plan, find a sports doctor, try a free 10-minute online session, and shop second-hand gear for your sport.
Target Users	Injured athletes, sports fans and gym-goers, sports doctors and physios, and people selling used sports gear.
Live site	https://logy-ss.github.io/Vivestand/
Code	https://github.com/logy-ss/Vivestand

Tech Stack | التقنيات المستخدمة

Category	Technology	Purpose
Pages	HTML	11 pages, one folder each in `src/`
Look	CSS	One `.css` per page, plus shared colours, header and footer in `src/Components/`
Font	Delius, from Google Fonts	The only outside file the site loads
Hosting	GitHub Pages	Serves the folder as it is. Nothing to build.

2. Problem Statement | المشكلة

Athletes who get injured often don't know how serious the injury is, how long it takes to heal, or which doctor to see. Good recovery gear is also expensive. Vivestand gives them one place for a recovery plan, a doctor and gear.

Why does it matter? | لماذا هذا مهم؟

Without a clear plan, athletes go back to training too early and get hurt again, or they stop playing. A small injury can turn into a long one.

How is it currently solved? | كيف تُحل المشكلة حاليًا؟

Most athletes ask a coach or a friend, search online, or wait for a clinic appointment. The advice is mixed, doctors are hard to compare, and there is no single place for plans, doctors and gear.

3. Technical Architecture | البنية التقنية

Project Structure | هيكل المشروع

```

Each page folder holds `page.html` and `page.css`, plus `page.js` when something happens on a click. (`Equepment` is spelled this way in the code, so the links use that spelling.)

Architecture and Data Flow | تدفق البيانات

SRC/COMPONENTS/ · WRITTEN ONCE, SHARED

tokens.css
Colours (navy, 5 blues, 4 pinks), the Delius font and the 1440px page width. Loaded first on every page.

header.css · footer.css
The top bar and bottom bar. Their HTML is copied into each page.

cart-count.js
loadCart(), saveCart(), showCartCount(): keeps "🛒 Cart (3)" right on every page.

chat.css · chat.js
The 💬 chat. It answers with 1 of 5 ready-made lines after half a second.

Every page is one folder: page.html + page.css, plus page.js when something happens on a click.

Page	Own .js	Header + 🛒	Footer	💬 Chat

Key Files | الملفات الأساسية

File	Purpose
`src/Components/tokens.css`	The palette (`--navy`, `--blue-1` … `--blue-5`, `--pink` … `--pink-4`), the Delius font and the shared page width. Loaded first on every page.
`src/Components/cart-count.js`	Reads and saves the cart, and updates the cart number in the header on every page.
`src/Injuries/injuries.js`	`INJURIES`: 20 injuries, each with a title, a description, 5 symptoms, 4 recovery stages and 5 prevention tips. `showInjury()` fills the page from `?injury=`.
`src/Equepment/equepment.js`	`SPORTS` (14) and `PRODUCTS` (18 per sport, 252 in all). Shows the sport list, or one sport's products with "Add to cart".
`src/Online_session/online.js`	`showStep(n)` for the 4 steps, the 600-second timer, and the booking checks.
`src/Cart/cart.js`	Draws the cart with – / +, adds up the total, checks the delivery form, and empties the cart after the order.
`src/Components/chat.js`	Shows what you type with `textContent`, then answers with 1 of 5 ready-made lines after 500 ms.

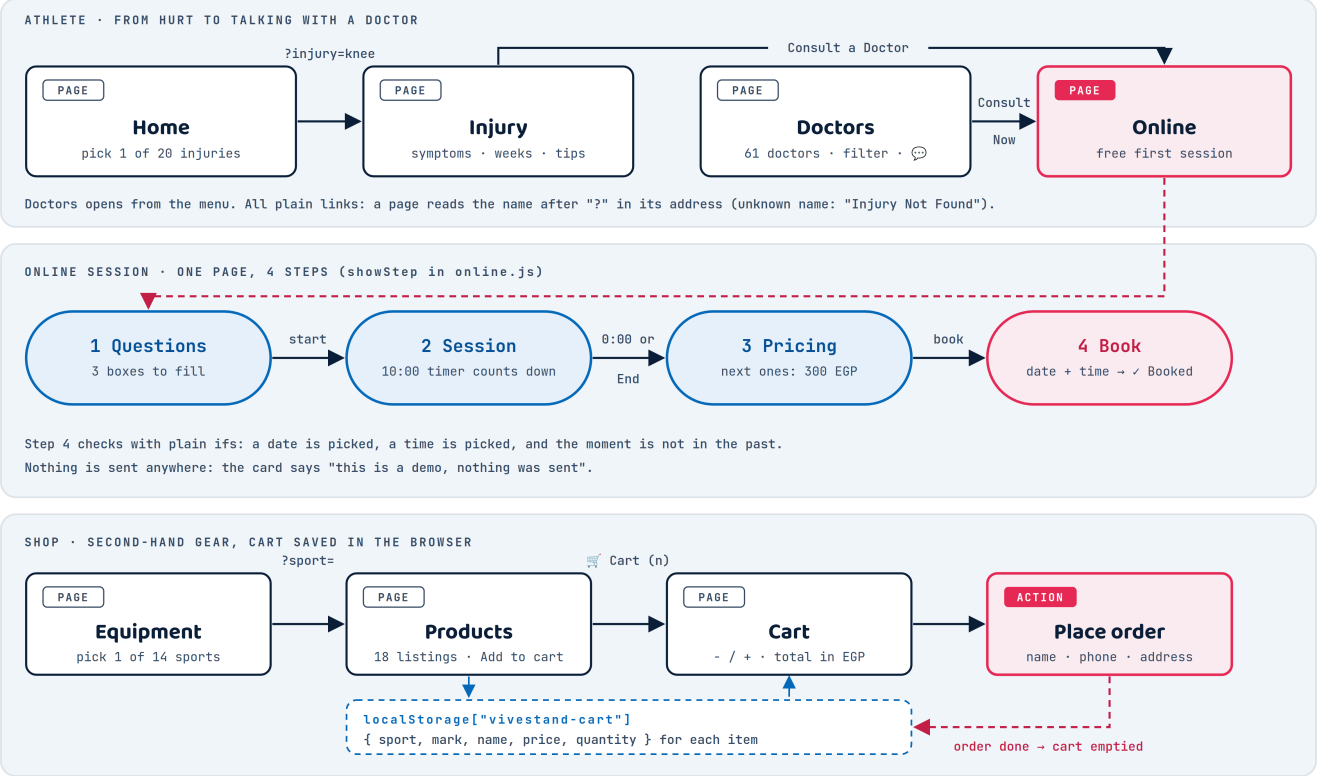

4. Features & User Flow | المميزات ورحلة المستخدم

Feature List | قائمة المميزات

#	Feature	Description	Status
1	Injury picker	20 injury cards on Home, from shoulder to ACL. Each is a plain link to its own page.	Complete
2	Injury pages	Symptoms, a recovery plan in 4 stages and prevention tips. An unknown name shows "Injury Not Found".	Complete
3	Doctors	61 Egyptian doctors in 6 groups (shoulder, elbow, knee, back & spine, general sports, physical therapy) with a filter.	Complete. Every "Consult Now" goes to the same doctor.
4	Chat	A 💬 chat on Doctors and Online. Messages up to 200 characters.	Demo. Answers are 5 ready-made lines.
5	Free online session	3 questions → a 10-minute timer → prices (300 EGP) → pick a date and time. Times in the past are refused.	Demo. Nothing is sent.
6	Pave Your Well	6 prevention tips, 4 kinds of food, a 6-meal daily plan, 12 exercises in 3 groups and a 7-day training program.	Complete
7	Recovery	Return-to-training plan in Arabic and English: 5 phases, physiotherapy, nutrition, equipment, warning signs and 4-week plans for 6 sports.	Complete

#	Feature	Description	Status
8	Equipment shop	14 sports, 18 listings each, with seller, condition and price in EGP. "Add to cart" adds one more each click.	Complete
9	Cart	– / + for each item, the total, and a delivery form (name, phone, address).	Demo. No payment, nothing is sent.
10	Log In, Sign Up, Contact Us	Forms with friendly messages for empty boxes and emails without "@".	Demo. Nobody is really logged in.

User Flow | رحلة المستخدم

Screen Reference | الشاشات

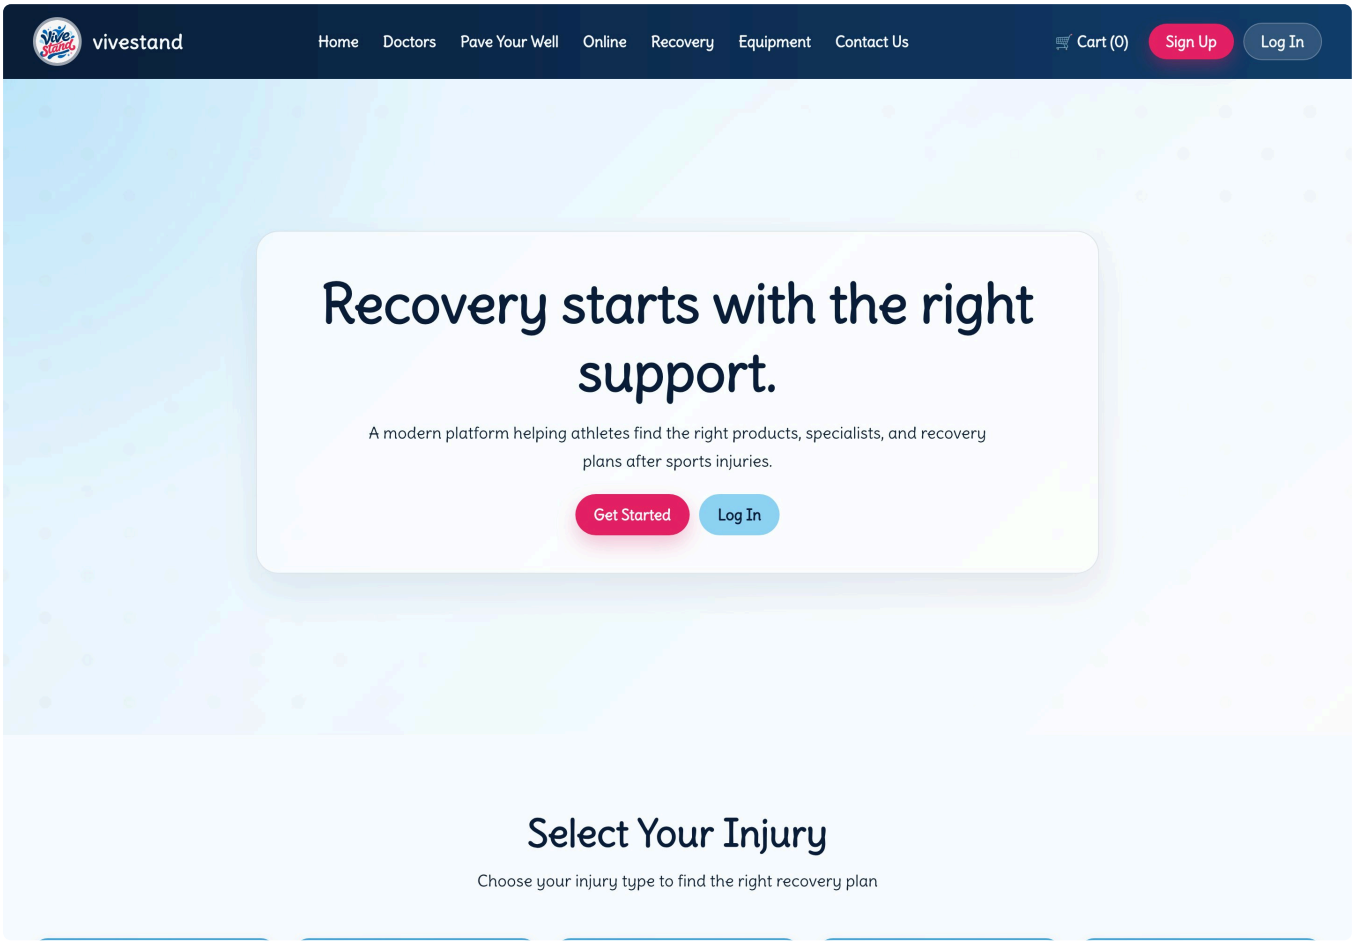

Screen	File	Description
Home	`src/Home/home.html`	Welcome box, 20 injury cards (5 per row), "Why Choose Vivestand?" and "How It Works".
Injury	`src/Injuries/injuries.html`	One injury: recovery plan, common symptoms, prevention tips and three buttons.
Doctors	`src/Doctors/doctors.html`	7 filter cards (All + 6 groups) and the doctor cards, plus the chat.
Online	`src/Online_session/online.html`	Dr. Ahmed El-Shaer's card, the 4-step session and the chat.
Pave Your Well	`src/Professional/pave_your_well.html`	Prevention, nutrition, exercises and the weekly training program.

Screen	File	Description
Recovery	`src/Recovery/recovery.html`	Right-to-left Arabic page with English blocks beside it.
Equipment	`src/Equepment/equepment.html`	The sport list, or one sport's products when the address has `?sport=`.
Cart	`src/Cart/cart.html`	The cart, the total and the delivery form.
Contact Us	`src/contact_us/contact_us.html`	Name, number, email and problem.
Log In	`src/Login/login.html`	Email and password. No header.
Sign Up	`src/Signup/signup.html`	Full name, age, email and password. No header.

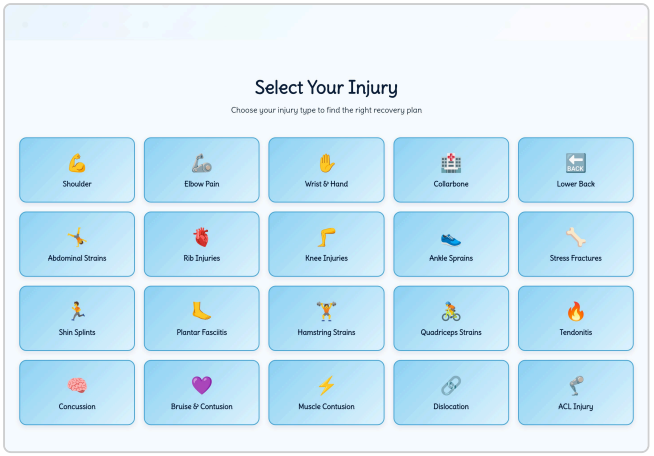

Every page except Log In and Sign Up has the same header: 7 links (Home, Doctors, Pave Your Well, Online, Recovery, Equipment, Contact Us), then 🛒 Cart, Sign Up and Log In.

Recovery & Return-to-Training Plan

General guidance for recovery, strengthening, and preparing to return to training based on sport and injury.

Core Return Phases

1. **Phase 0 — Acute Recovery:** Relative rest, ice, elevation, good sleep, and nutrition.
2. **Phase 1 — Restore Motion:** Gentle mobility and range-of-motion exercises avoiding sharp pain.
3. **Phase 2 — Initial Strength:** Isometrics and light resistance (bands or light weights).
4. **Phase 3 — Advanced Strength & Endurance:** Progressive loading, multi-directional and compound exercises.
5. **Phase 4 — Sport-Specific Training:** Simulate sport movements, increase speed/change-of-direction, then gradual return to competition.

Physiotherapy Examples

- **Flexibility & ROM:** Joint circles, light hamstring stretches.
- **Initial Strength:** Isometrics then light resistance (3 sets × 8–15 reps).
- **Balance & Stability:** Single-leg drills, stability ball, bodyweight control exercises.
- **Advanced Power & Speed:** Low-impact plyometrics, change-of-direction drills, sport-specific movements.

Nutrition Pre/Post Exercise

Before training (1–3 hrs): Carbs + light protein (e.g. oats + yogurt + banana).

After training (0–60 min): Fast-absorbing protein + carbs (e.g. whey shake + banana or chicken + rice).

Recovery meal (1–3 hrs): Balanced meal: protein, complex carbs, vegetables, healthy fats.

Avoid right after: Heavy fatty meals, alcohol, and large amounts of refined sugars.

خطة التعافي والعودة للتدريب

إرشادات عامة للاستشفاء، تقوية الجسم، والتأهب للعودة للتدريب حسب نوع الرياضة والإصابة.

المراحل الأساسية للعودة

1. **المرحلة 0 — الراحة والاستشفاء الحاد:** راحة نسبية، ثلج، رفع للمنطقة المصابة، نوم كافٍ، تغذية جيدة.
2. **المرحلة 1 — استعادة الحركة:** تمارين مرونة ونطاق حركة خفيفة مع تجنب الألم الحاد.
3. **المرحلة 2 — تقوية مبدئية:** تمارين إيزومتريك ومقاومة خفيفة (بمقاومات مطاطية أو أوزان خفيفة).
4. **المرحلة 3 — تحمل وقوة متقدمة:** زيادة الحمل تدريجيًا، متعدد الاتجاهات، تمارين مركبة.
5. **المرحلة 4 — تدريب خاص باللعبة:** محاكاة حركات اللعبة، زيادة السرعة والتغيير الاتجاهي، ثم العودة للمنافسة تدريجياً.

تمارين العلاج الطبيعي (نماذج)

- **مرونة ونطاق حركة:** دوائر مفصلية، استطالات خفيفة لأوتار العضلات.
- **قوة مبدئية:** إيزومتريك ثم مقاومات خفيفة (3 مجموعات × 8–15 تكرار).
- **توازن واستقرار:** تمرينات على ساق واحدة، كرة استقرار، تدريبات بوزن الجسم.
- **قوة متقدمة وسرعة:** قفزات خفيفة، تمرينات تغيير اتجاه، تدريبات خاصة بالرياضة.

التغذية قبل وبعد التمرين

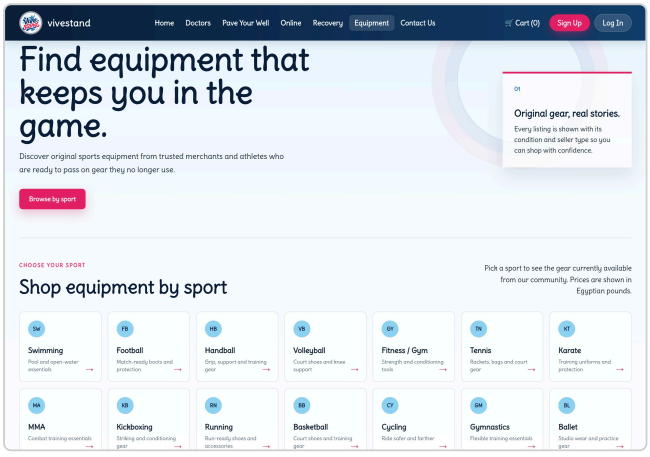

قبل التمرين (1–3 ساعات): كربوهيدرات + بروتين خفيف (مثال: شوفان + لبن + موز).

بعد التمرين (0–60 دقيقة): بروتين سريع الامتصاص + كربوهيدرات (مثال: مخفوق بروتين + موز أو دجاج + رز).

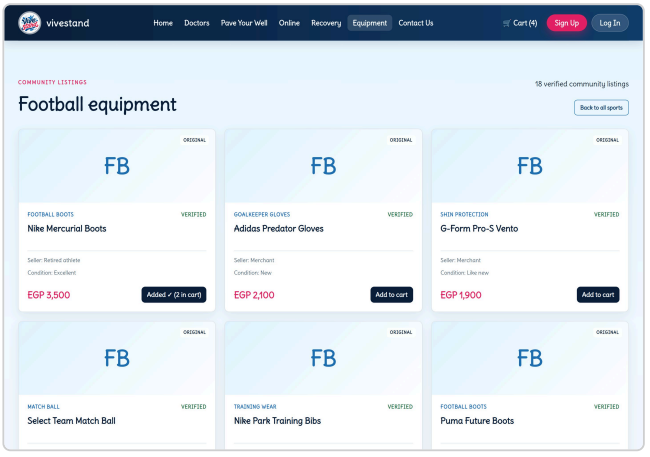

وجبة التعافي (1–3 ساعات): وجبة متكاملة: بروتين، كربوهيدرات معقدة، خضار، ودهون صحية.

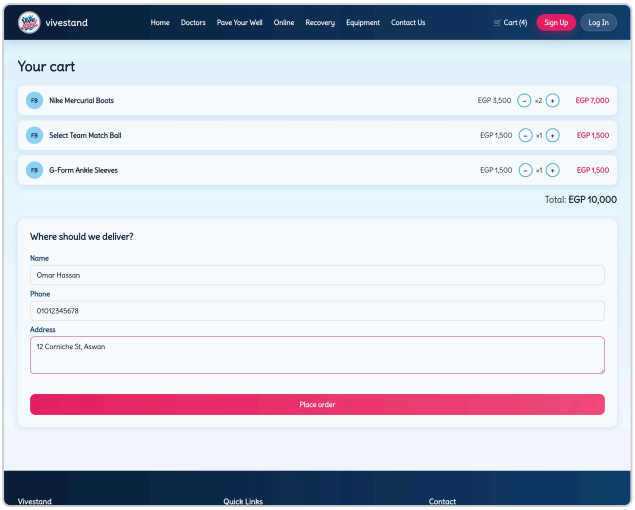

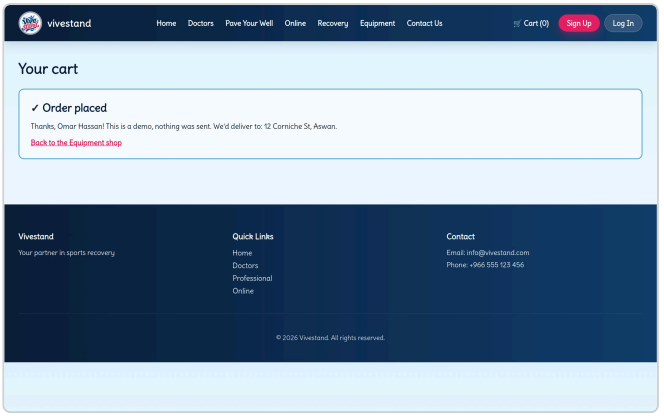

تجنب فوراً بعد التمرين: وجبات دهنية ثقيلة، كحول، وكميات كبيرة من السكريات المكررة.

Try the site: https://logy-ss.github.io/Vivestand/

Design System | نظام التصميم

Element	Current implementation
Logo	"Vive" in navy and "stand" in pink brush letters, with a blue figure jumping up, blue splashes and sparkles (`images/logo.png`). The header shows it next to the word "vivestand".
Navy	`--navy` `#0B1F3A` : header, footer and headings
Blues	`--blue-1` `#123E6B` to `--blue-5` `#DFF4FF` : page headers, injury cards, backgrounds
Pink	`--pink` `#E42264` to `--pink-4` `#FFC0D5` : main buttons, the chat button, active steps
Text / white	`--text` `#102235` on `--white` `#F9FCFF`

Element	Current implementation
Font	Delius on every page, set once in `tokens.css`. Forms inherit it. The poster and slides use Pacifico (wordmark), Baloo 2, Nunito and JetBrains Mono.
Page width	`--page-width` 1440px with a 32px gutter (16px on phones). Header, content and footer share one `.container`, so every edge lines up with the logo.
Cards and grids	Rounded white or light-blue cards. Rows come out even at 1440px: Home 5 per row, Equipment 7, Doctors 5.
Header	One row from 1201px up, the links on their own row at ≤1200px, centred on phones (≤640px).
Forms	`novalidate`, so the page's own friendly messages show instead of the browser's.

6. Data Sources | مصادر البيانات

Data Sources | مصادر البيانات

Source	Type	Description
`INJURIES` in `src/Injuries/injuries.js`	Typed into the code	20 injuries, keyed by the name Home puts after `?injury=`
`SPORTS` and `PRODUCTS` in `src/Equepment/equepment.js`	Typed into the code	14 sports and 252 listings (18 each), prices in EGP
`src/Doctors/doctors.html`	Typed into the HTML	61 doctor cards in 6 groups
Pave Your Well and Recovery pages	Typed into the HTML	The nutrition, exercise and return-to-training plans
What the visitor types	User input	Form answers are checked and then shown back. Only the cart is saved.

7. Marketing Plan | خطة تسويقية

Target Audience | الجمهور المستهدف

- **Primary:** Injured athletes aged 18–45 in Egypt, starting with the 14 sports in the shop.
- **Secondary:** Sports fans, gym members and coaches who want to prevent injuries, plus doctors, physios and sellers of used gear.

8. Student Worksheet | ورقة عمل الطالب

My Project Information | معلومات مشروعي

Student Name: Logien Mohamed

Project Title: Vivestand: Sports Injury Recovery Platform

What is your project about? | عن ماذا يتحدث مشروعك؟

Vivestand is a website for athletes who got hurt. You pick your injury and read how to recover, find a sports doctor, try a free 10-minute online session, and shop for second-hand sports gear.

What problem does it solve? | ما المشكلة التي يحلها؟

Injured athletes often don't know how serious their injury is, how long it takes to heal, or which doctor to see. Vivestand puts the recovery plan, the doctors and the gear in one place.

What I Learned | ماذا تعلمت

1. **The hardest part:** writing a clear week-by-week recovery plan for every injury, and making one Injuries page show the right one from the link, like `injuries.html?injury=knee`.
2. **The most fun part:** building the online session: three questions, then a 10-minute timer, then the prices.
3. **If I had more time:** I would add real bookings and payments for the doctors, and let sellers post their own used gear.
4. **One thing I would do differently:** plan the shared header, footer and colours in `src/Components/` from the first day, so every page looks the same without copying.
