HEALTH TECH · WEBSITE

Legion

Care, made clearer.

See your health signals in one calm place, ask the AI care agent how you feel, and give your care team the context they need.

01 · THE PROBLEM المشكلة

Health data is scattered, and visits start with no context.

Signals everywhere

Pulse, sleep, steps and oxygen sit in different apps and devices.

Hard to explain

Describing a symptom in your own words is hard, and details get lost.

Clinicians start blind

A care team often sees no trends before the conversation begins.

WHO IT'S FOR لمن هذا التطبيق

Legion is made for the whole care journey.

01

Patients

A clear view of their own pulse, oxygen, steps and sleep.

02

Care teams

Trend lines, symptoms and history before the conversation starts.

03

Hospitals and clinics

A way to connect devices and records into one workspace.

04

Health authorities

A care network with accredited specialists they can work with.

OUR SOLUTION الحل

Look. Ask. Reach out.

1

Look

The home and platform pages show what Legion does.

→

2

Ask

Type how you feel into the AI care agent chat.

→

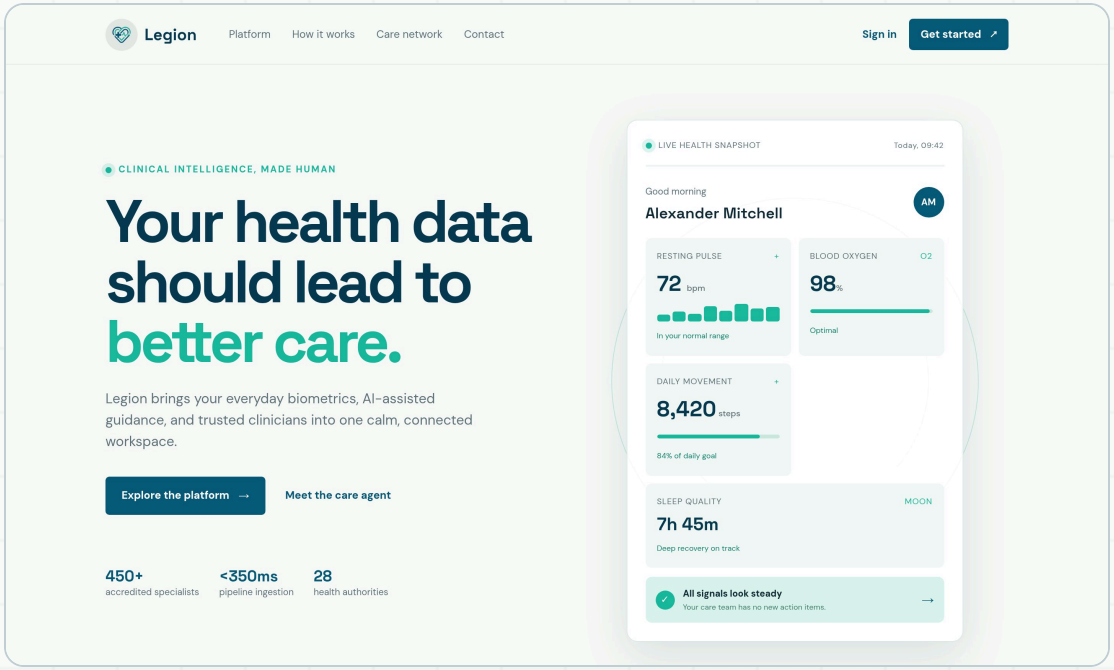

3

Reach out

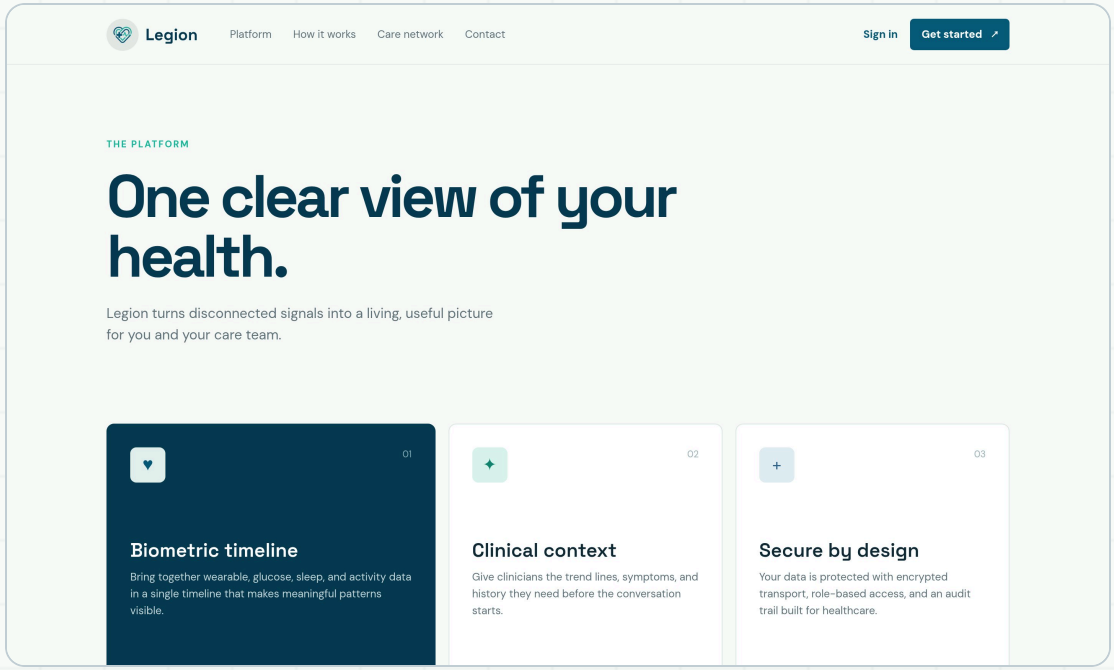

Send a message to the team, or create an account.

02 · DEMO عرض

See the big picture.

Home: the headline, short facts and a sample health dashboard.

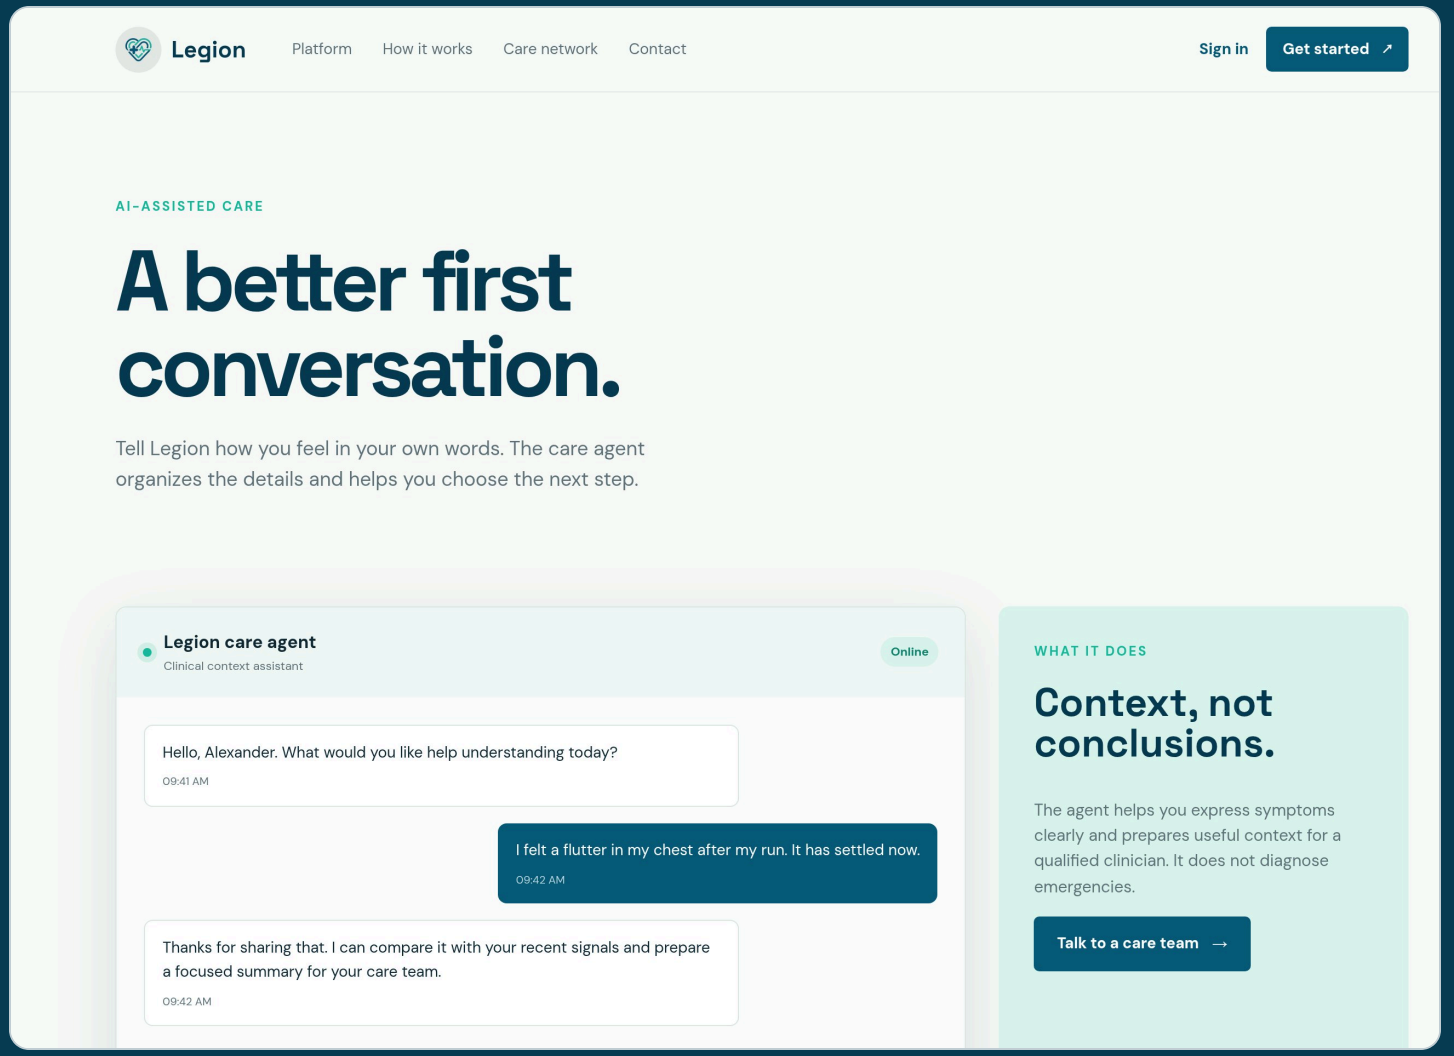

Platform: three feature cards, a workflow and care-network numbers.

02 · DEMO عرض

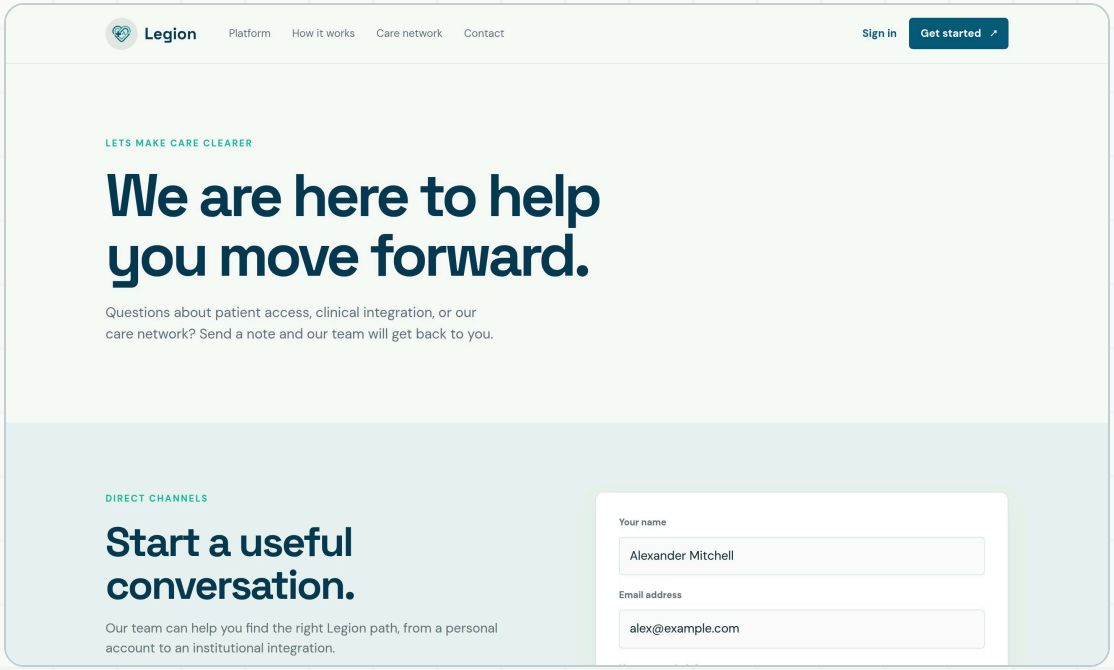

Ask the care agent.

- **Say it your way**
  Type how you feel in your own words.
- **See a note right away**
  The chat shows that your message was received.
- **Context, not conclusions**
  The page explains the agent prepares context for a clinician.
- **Not for emergencies**
  It says clearly that it does not diagnose emergencies.

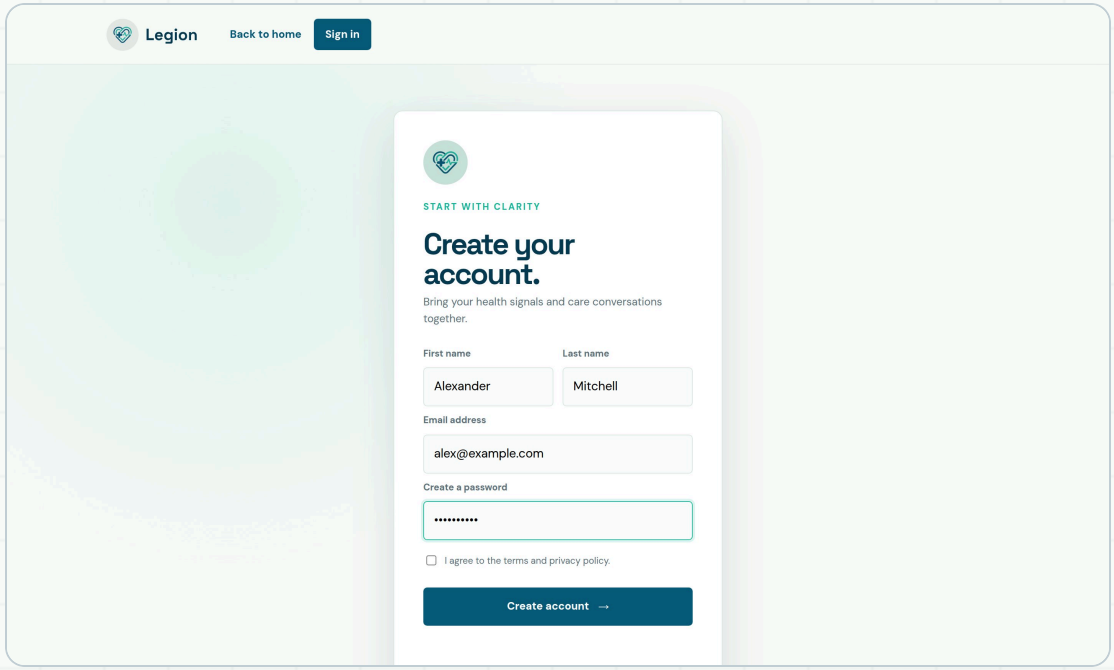

02 · DEMO عرض

Reach out.

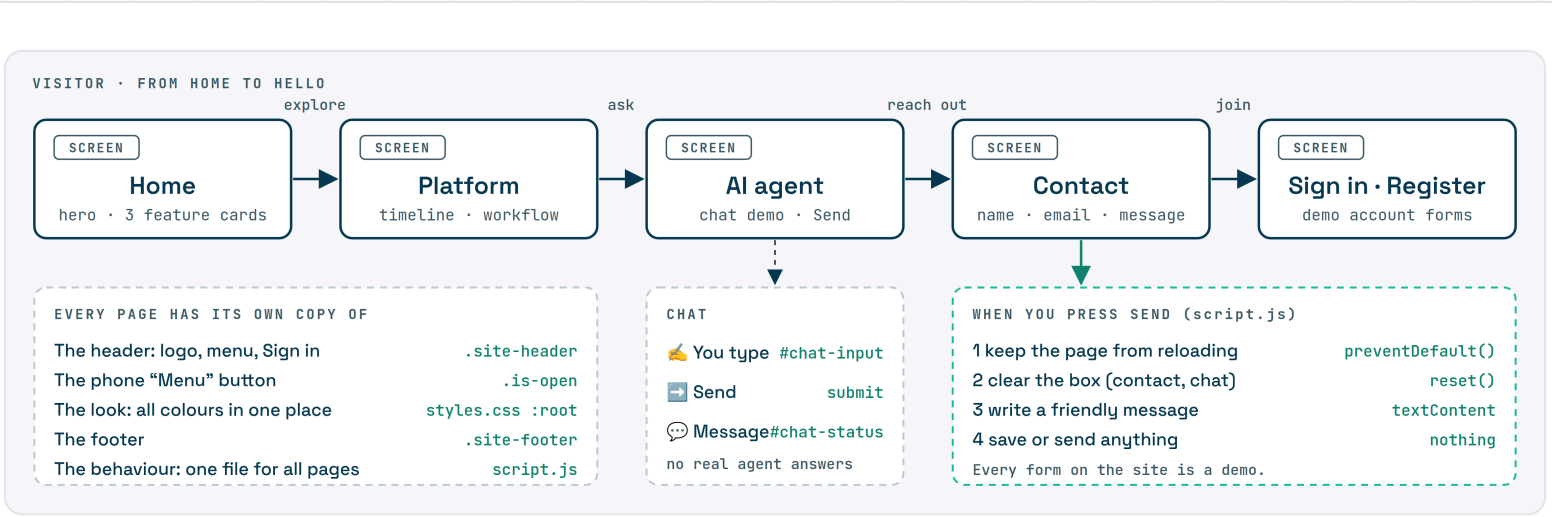

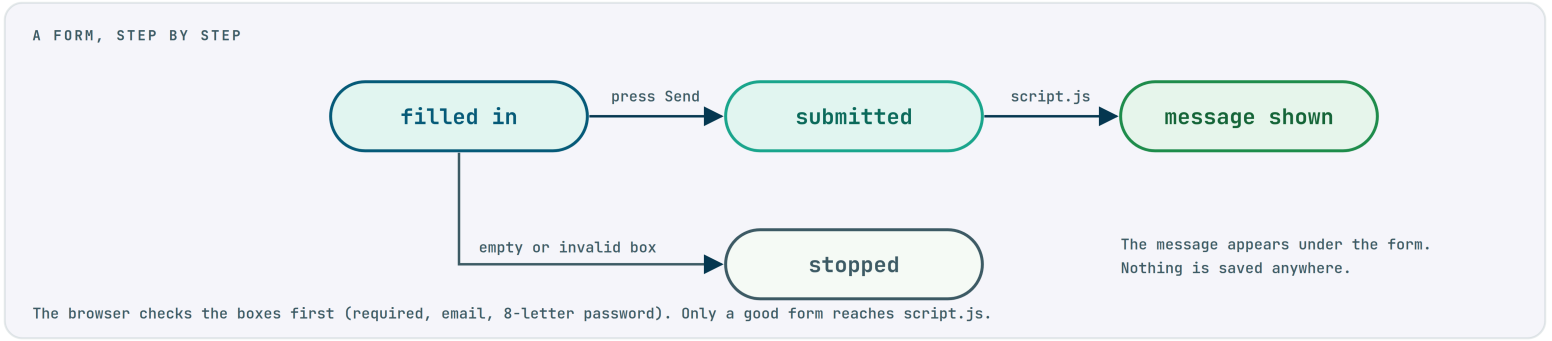

Contact: name, email and message, with a thank-you note.

Register: a demo account form.

One click, one message.

4 demo forms: sign in, register, contact and chat

0 things saved or sent anywhere

1 script shared by every page

Built so a beginner can read every line.

HOW EVERY PAGE IS BUILT

HTML

One .html file per page

Its own copy of the header
and the footer.

↓

STYLES

styles.css

Colours are set once on :root.
One block for each part of a page.

↓

SCRIPT.JS

Looks for its own form

No form on the page?
Then it does nothing there.

Copying the header and footer is on purpose: every file can be read from top to bottom on its own.

WHICH PAGE HAS WHICH PART

Page	Menu header with links	Form	Message appears in
MARKETING PAGES			
🏠 Home	✓	contact form	#form-status
🧩 Platform	✓	—	—
💬 AI agent	✓	chat form	#chat-status
✉️ Contact	✓	contact form	#form-status
ACCOUNT PAGES · SHORT HEADER			
🔐 Sign in	—	login form + Show/Hide	#login-status
📝 Register	—	register form	#register-status

Sign in and Register have a short header (logo and two buttons), so they have no phone menu. 6 pages, 4 demo forms, 1 shared script.

0 libraries to install

6 pages, one .html file for each

53 lines in the one shared script

1 CSS file, with the colours set once

HTML for the pages · CSS for the look · JavaScript for the menu and the form messages · no database.

WHY THE NAME سر الاسم

Legion

“Legion” means a large group acting together. The name fits the idea: many signals, many people and many specialists working as one care network. The logo shows it too: a heart made of lines, a plus sign for medicine, and a heartbeat line.

Thank you.
