MEDICATION CARE · EGYPT

MedSync

Never miss a dose.

Doctors prescribe, patients get an alarm at dose time, and nurses mark every dose, so everyone can see who is on track.

01 · WHY Medicine only works if you take it.

THE PROBLEM المشكلة

Doses get forgotten.

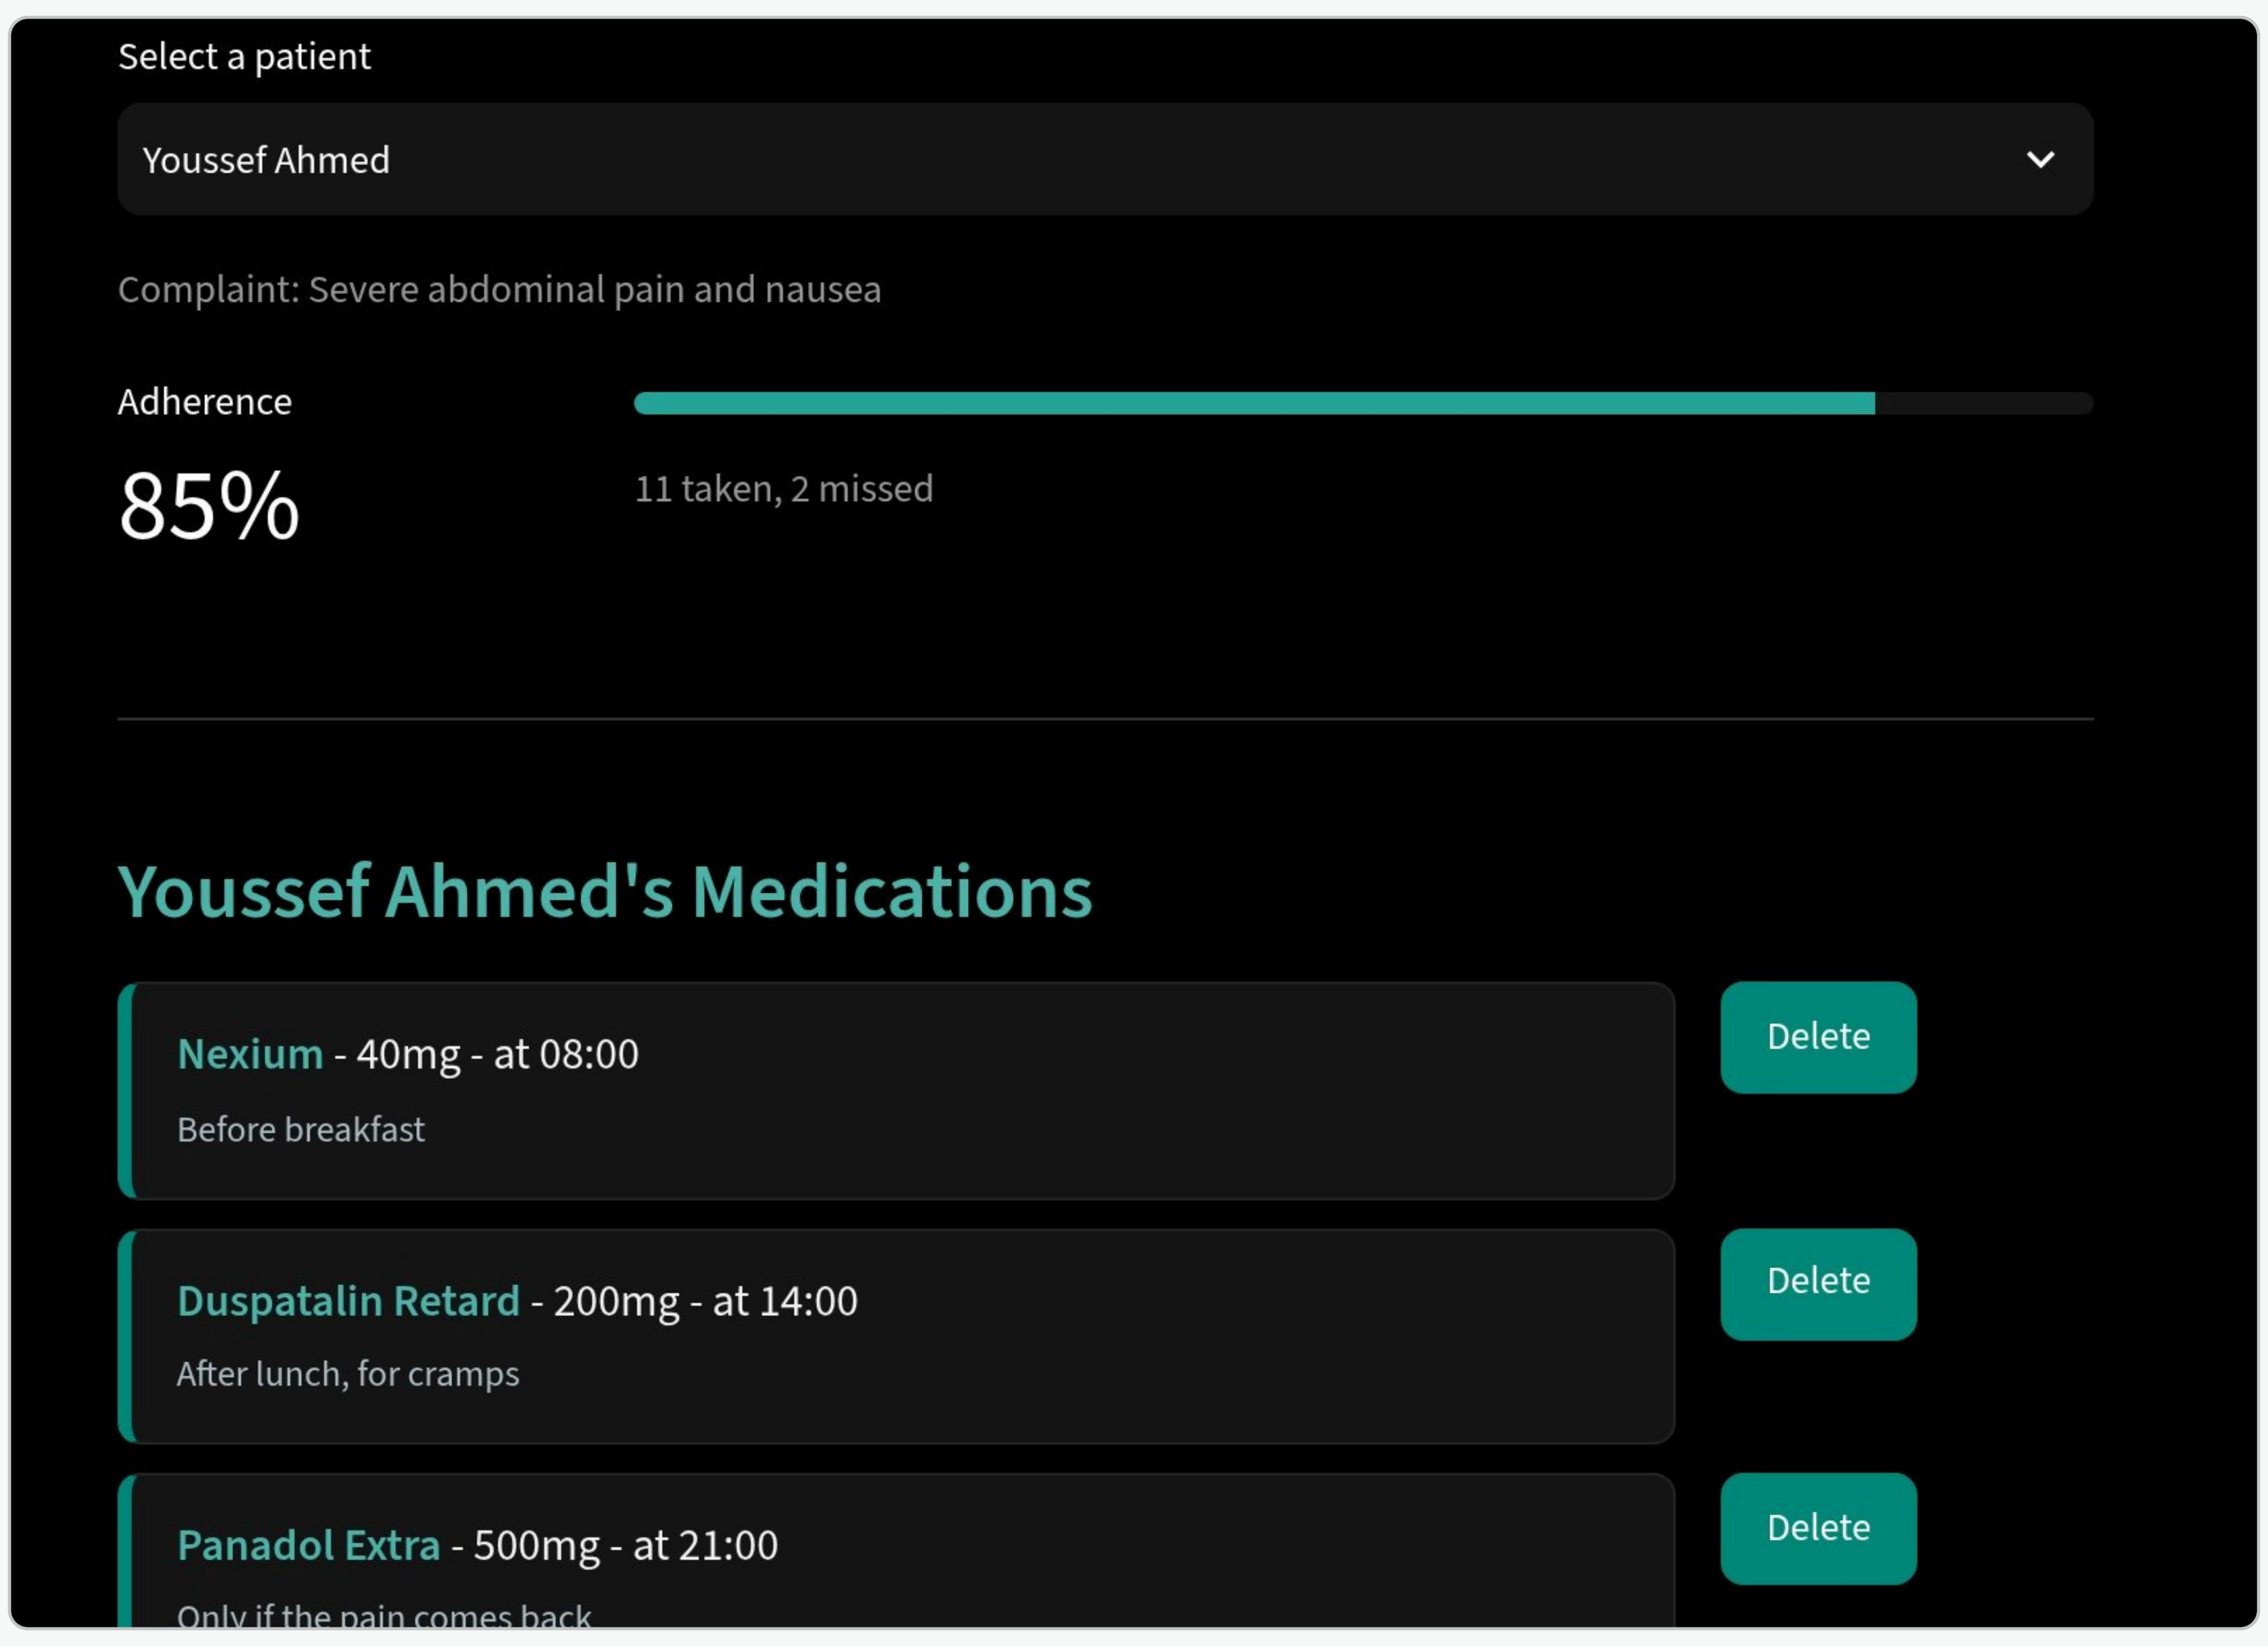
Patients who take medicine every day miss a dose or take it late. The doctor usually finds out only at the next visit, when the patient is already worse.

OUR SOLUTION الحل

Remind, record, review.

MedSync rings an alarm at each dose time, lets the nurse mark every dose, and shows the doctor and the patient an adherence score.

02 · SEE IT From prescription to dose. من الوصفة إلى الجرعة



Select a patient

Youssef Ahmed

Complaint: Severe abdominal pain and nausea

Adherence

85%

11 taken, 2 missed

Youssef Ahmed's Medications

Nexium - 40mg - at 08:00

Before breakfast

Duspatalin Retard - 200mg - at 14:00

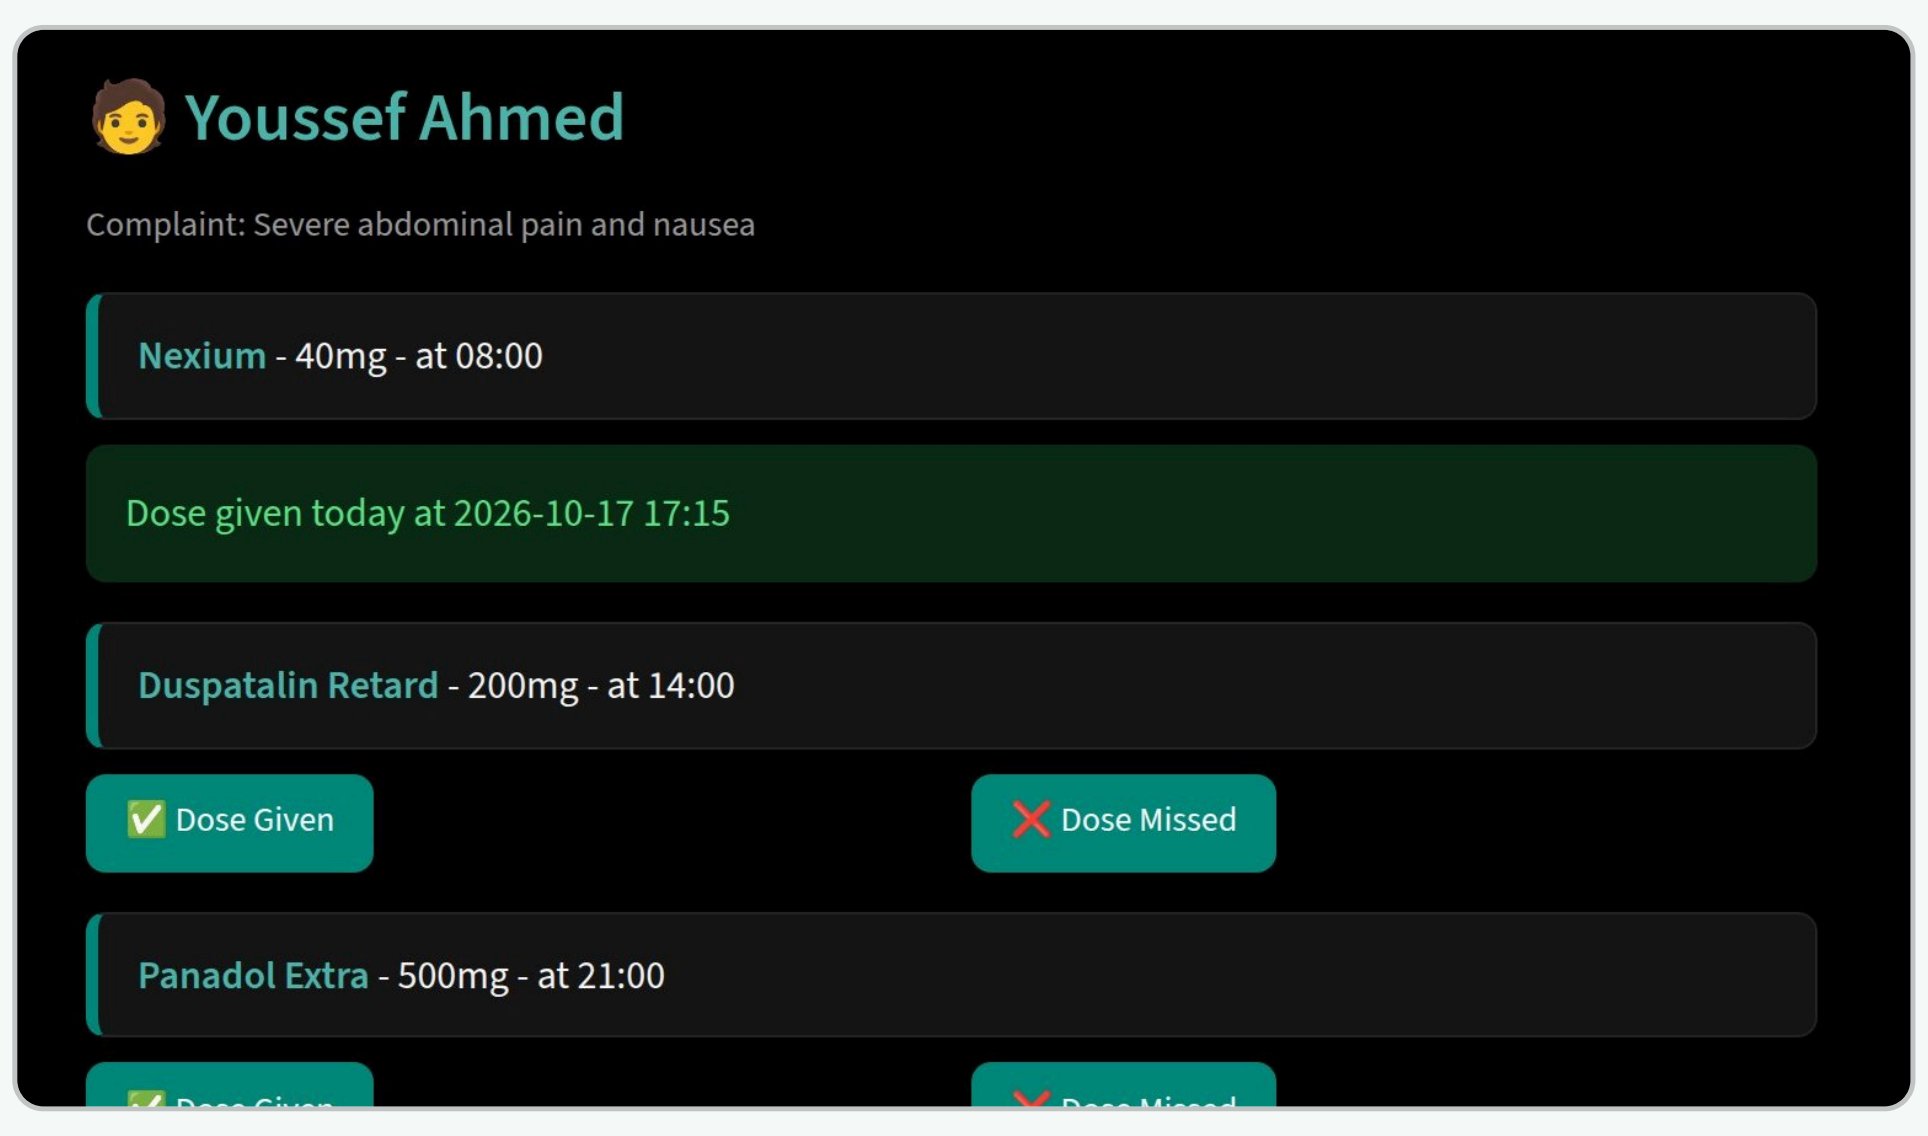
After lunch, for cramps

Panadol Extra - 500mg - at 21:00

Only if the pain comes back

The doctor's “My Patients” tab: Youssef's complaint, his adherence (11 of 13 doses, 85%), and his three medicines with their dose times. Below them, the form to prescribe from 207 medicines.

- **Prescribe in seconds**
  Search 207 medicines by name, then set the dosage, the dose time and a note.
- **A care team for each patient**
  New patients wait in a list until a doctor assigns them a nurse.
- **An alarm at dose time**
  The patient's page shows a banner, beeps and sends a browser notification.
- **Every dose is marked**
  The nurse taps “Dose Given” or “Dose Missed”, once per medicine each day.
- **Adherence at a glance**
  The share of doses taken, for the doctor and the patient, with a full history.
- **Visit notes and a chatbot**
  Doctors log diagnoses. The chatbot answers from the database, and asks Gemini the rest.



🧑 Youssef Ahmed

Complaint: Severe abdominal pain and nausea

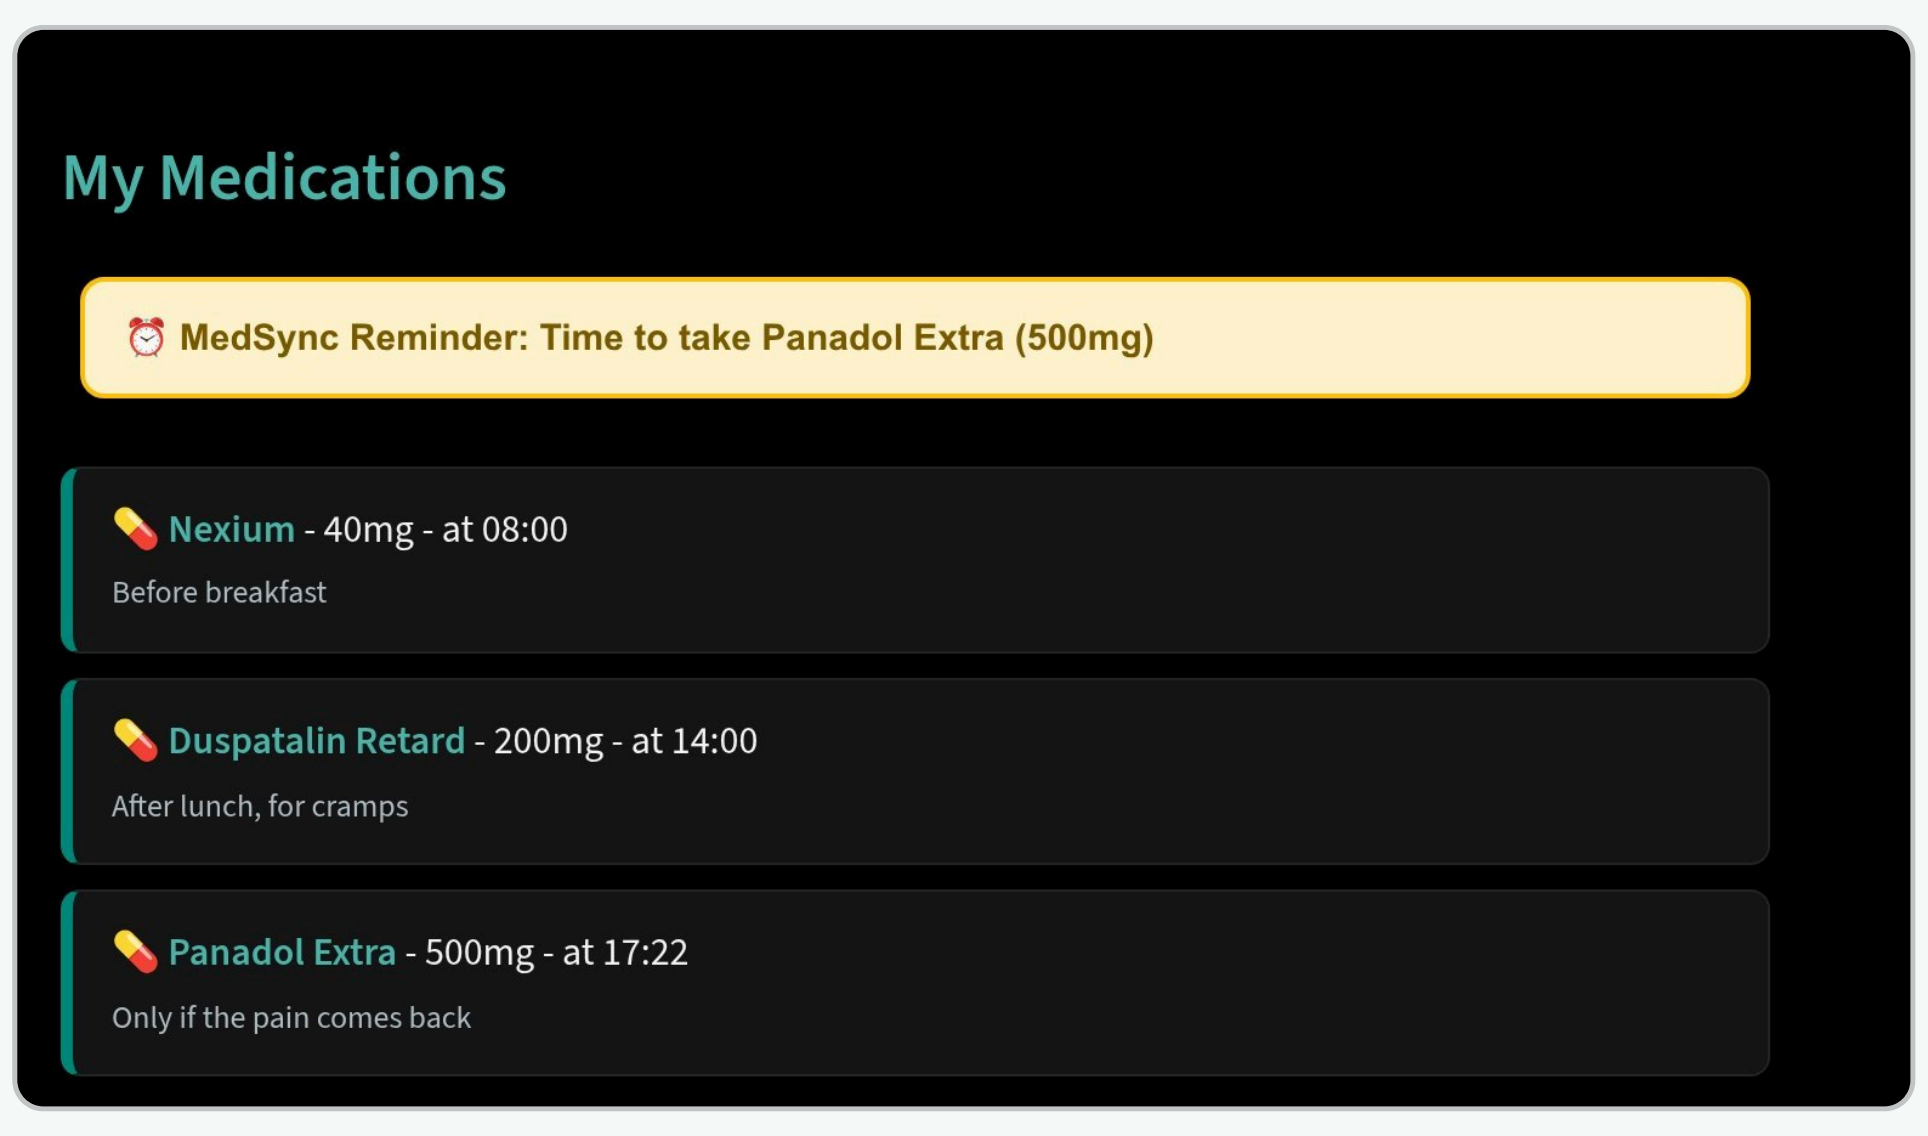
Nexium - 40mg - at 08:00

Dose given today at 2026-10-17 17:15

Duspatalin Retard - 200mg - at 14:00

Panadol Extra - 500mg - at 21:00

Nurse: today's doses, given or missed.



My Medications

⏰ MedSync Reminder: Time to take Panadol Extra (500mg)

💊 Nexium - 40mg - at 08:00

Before breakfast

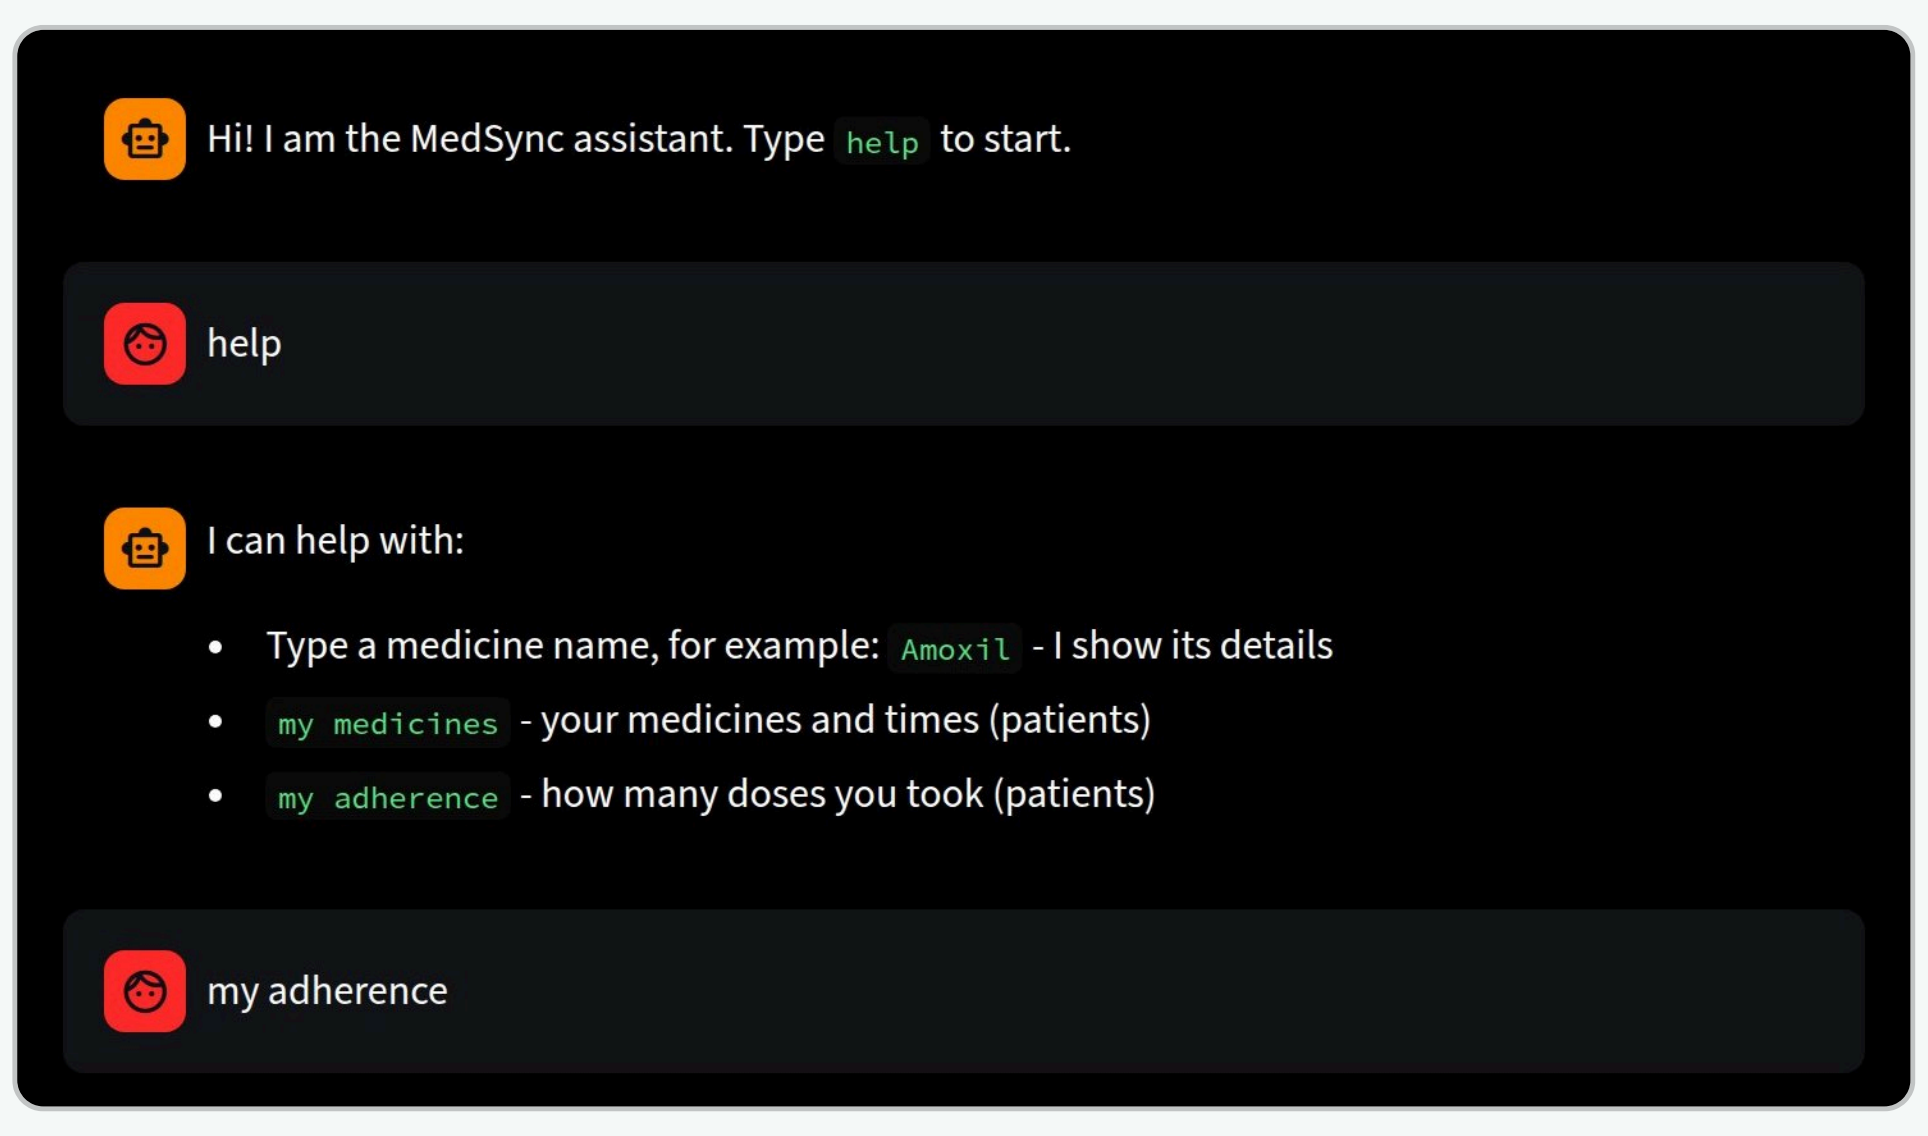
💊 Duspatalin Retard - 200mg - at 14:00

After lunch, for cramps

💊 Panadol Extra - 500mg - at 17:22

Only if the pain comes back

Patient: the alarm banner at dose time.



Hi! I am the MedSync assistant. Type `help` to start.

help

I can help with:

- Type a medicine name, for example: `Amoxil` - I show its details
- `my medicines` - your medicines and times (patients)
- `my adherence` - how many doses you took (patients)

my adherence

Chatbot: “help” and “my adherence”, no internet needed.

2 job, notes, complaint `patients`

3 patient + doctor + nurse `patient_care_team`

the doctor who assigns becomes the patient's doctor

PRESCRIPTIONS

medicine `1 of 207`

dosage `"40mg"`

dose time `"08:00"`

+ optional notes

EVERY 15 SECONDS

clock = dose time?

→ ring once a day

per medicine

only while page is open

DOSE_LOG

dose_date `today`

status `taken/missed`

marked_by `nurse`

+ marked_at, the time

every prescription starts the day here

ONE DOSE, EACH DAY

ADHERENCE

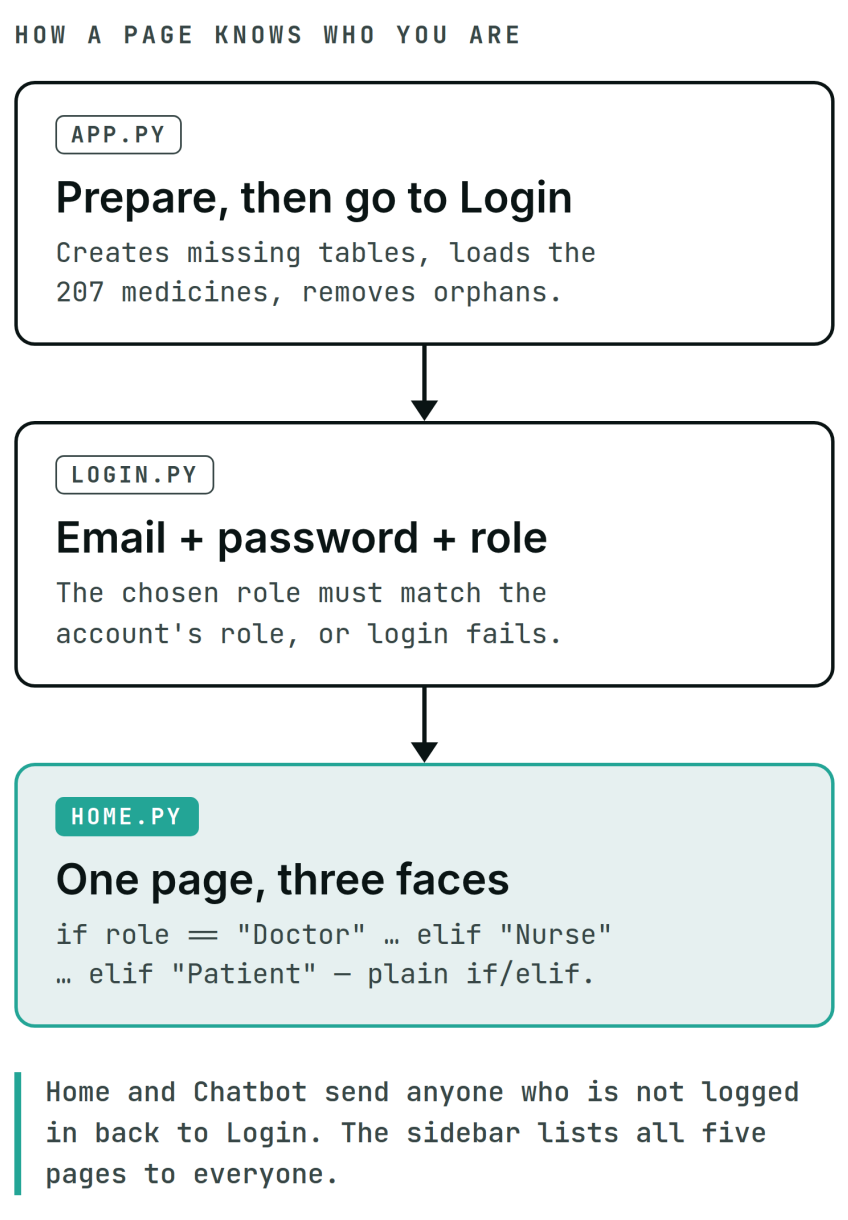
taken ÷ (taken + missed)

shown to the doctor and the patient as % and a bar, and answered by the chatbot: "my adherence"

One mark per prescription per day. Once marked, the buttons are replaced by the result, so there is no undo.

WHO SEES WHAT

HOW A PAGE KNOWS WHO YOU ARE



APP.PY

Prepare, then go to Login

Creates missing tables, loads the 207 medicines, removes orphans.

LOGIN.PY

Email + password + role

The chosen role must match the account's role, or login fails.

HOME.PY

One page, three faces

```
if role == "Doctor" … elif "Nurse"
… elif "Patient" — plain if/elif.
```

Home and Chatbot send anyone who is not logged in back to Login. The sidebar lists all five pages to everyone.
