PYGAME ZERO · RACING GAME

TURBO

✏️ **Student writes:** a short tagline, 2–4 words

✏️ **Student writes:** one or two sentences: what can someone do with TURBO?

01 · WHY ✏️ Student writes: a headline about the problem

THE PROBLEM المشكلة

✏️ **Student writes: the problem in 3–5 words**

✏️ **Student writes:** 2–3 sentences: who is this game for, and what is missing for them today?

OUR SOLUTION الحل

✏️ **Student writes: the solution in 3–5 words**

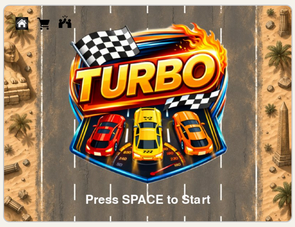

✏️ **Student writes:** 2–3 sentences: how does TURBO fix it?

02 · SEE IT Dodge. Collect. Upgrade. تفادَ، اجمع، طوّر

Level 2, the forest road: steer the Formula 1 car between the traffic and grab the coins. Score in the middle, hearts and coins at the bottom.

- **Dodge the traffic**
  Steer with ← → across 6 lanes. A crash costs 1 of your 3 hearts.
- **Six roads**
  Egypt, forest, snow, night, green fields and desert. A new road every 30 points.
- **It gets harder**
  Every 10 points the road speeds up and the cars come sooner.
- **Collect coins**
  A coin rolls in every 2.3 seconds. Touch it to hear the ding.
- **A car shop**
  Spend coins on 9 cars, from the free Red Racer to the 50-coin Golden Car.
- **Learn a road sign**
  Every game over shows 1 of 20 real road signs and what it means.

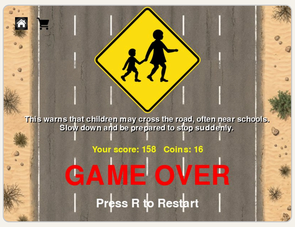

Start: the logo, and buttons for home, shop and makers.

Car shop: buy a car once, then pick it any time.

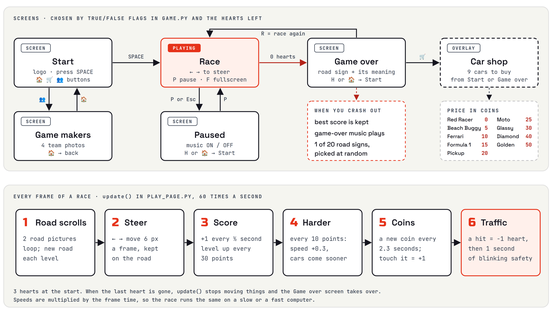

Paused: P to go on, and music on or off.

Game over: a road sign to learn, your score, R to race again.

03 · HOW Six roads, one game loop. ست طرق وحلقة لعب واحدة

SCREENS, AND ONE FRAME OF A RACE

THE SIX LEVELS

1
library to install: Pygame Zero

7
Python files: the main loop and one per screen

599
lines of code in all

0
classes: plain variables, ifs and loops

BUILT WITH

Python | Pygame Zero | pygame

✏️ **Student writes:** your name · team or school

✏️ **Student writes:** event name and year · your email

Coins, cars and best score are not saved: closing the game starts fresh.
