AI LEGAL HELPER · EGYPT

Ma‘at

Justice, explained.

Upload an Egyptian law, contract or court ruling. Ask in Arabic or English. Get a clear answer from your own document.

01 · WHY Legal text should not need a lawyer to read.

THE PROBLEM

Dense, costly, and generic

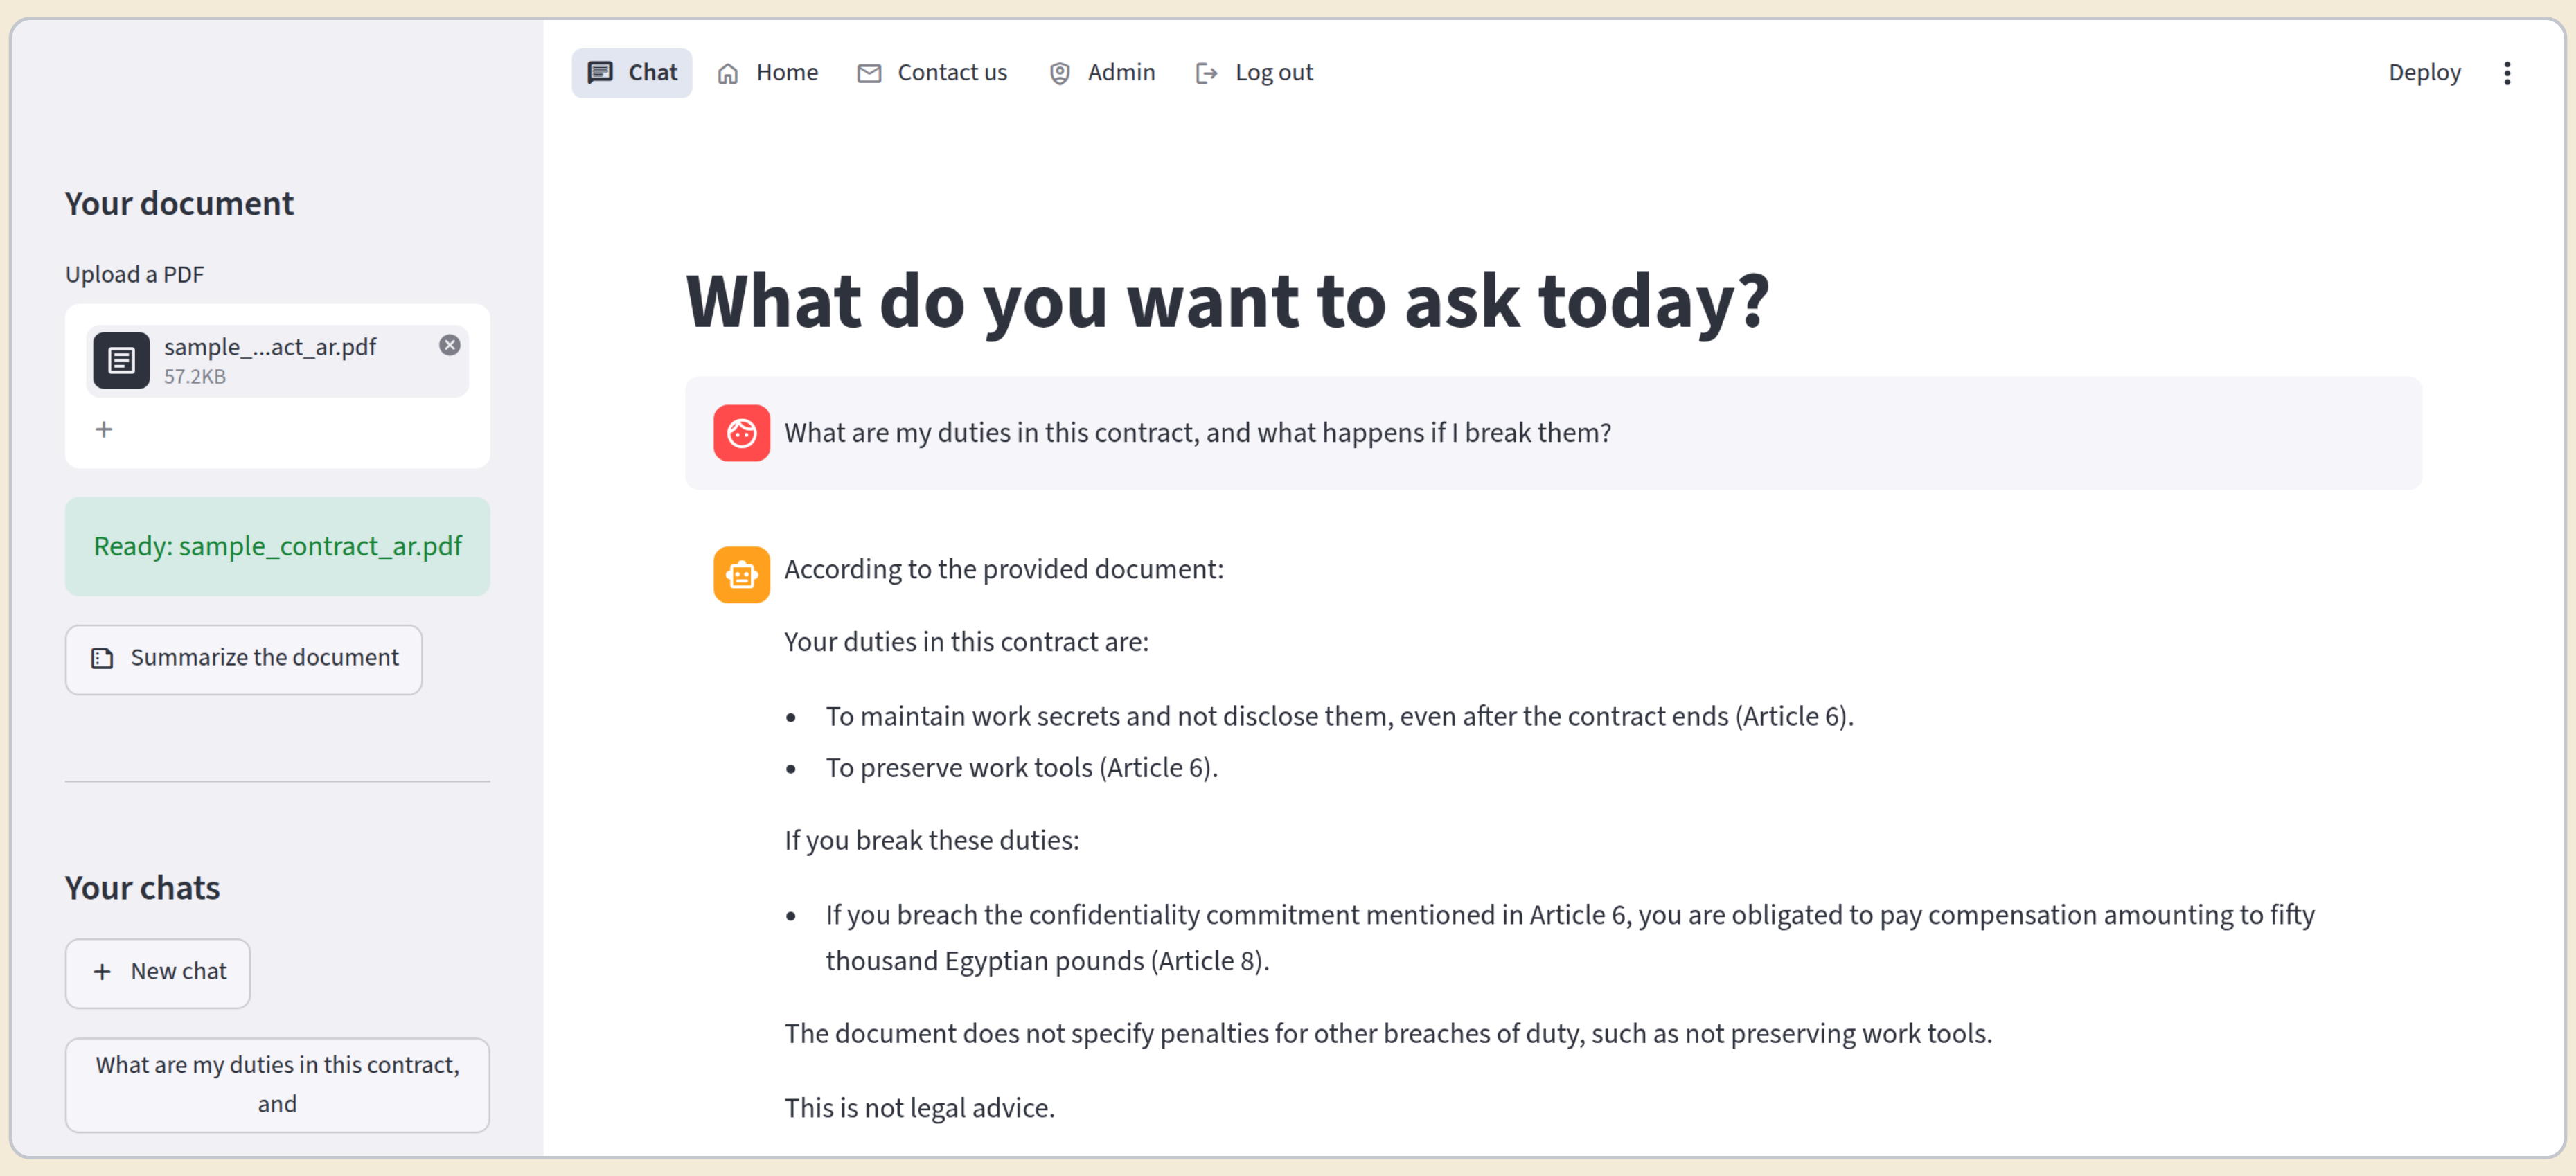
Egyptian laws, contracts and rulings are long and written in legal Arabic. A lawyer is expensive, and general chatbots don’t read *your* document, so they can be confidently wrong about it.

OUR SOLUTION

Ask your own PDF

Ma‘at reads the PDF you upload, finds the parts that answer your question, and explains them in plain Arabic or English, citing the article numbers.

02 · SEE IT A real answer, from a real run.



What do you want to ask today?

What are my duties in this contract, and what happens if I break them?

According to the provided document:

Your duties in this contract are:

- To maintain work secrets and not disclose them, even after the contract ends (Article 6).
- To preserve work tools (Article 6).

If you break these duties:

- If you breach the confidentiality commitment mentioned in Article 6, you are obligated to pay compensation amounting to fifty thousand Egyptian pounds (Article 8).

The document does not specify penalties for other breaches of duty, such as not preserving work tools.

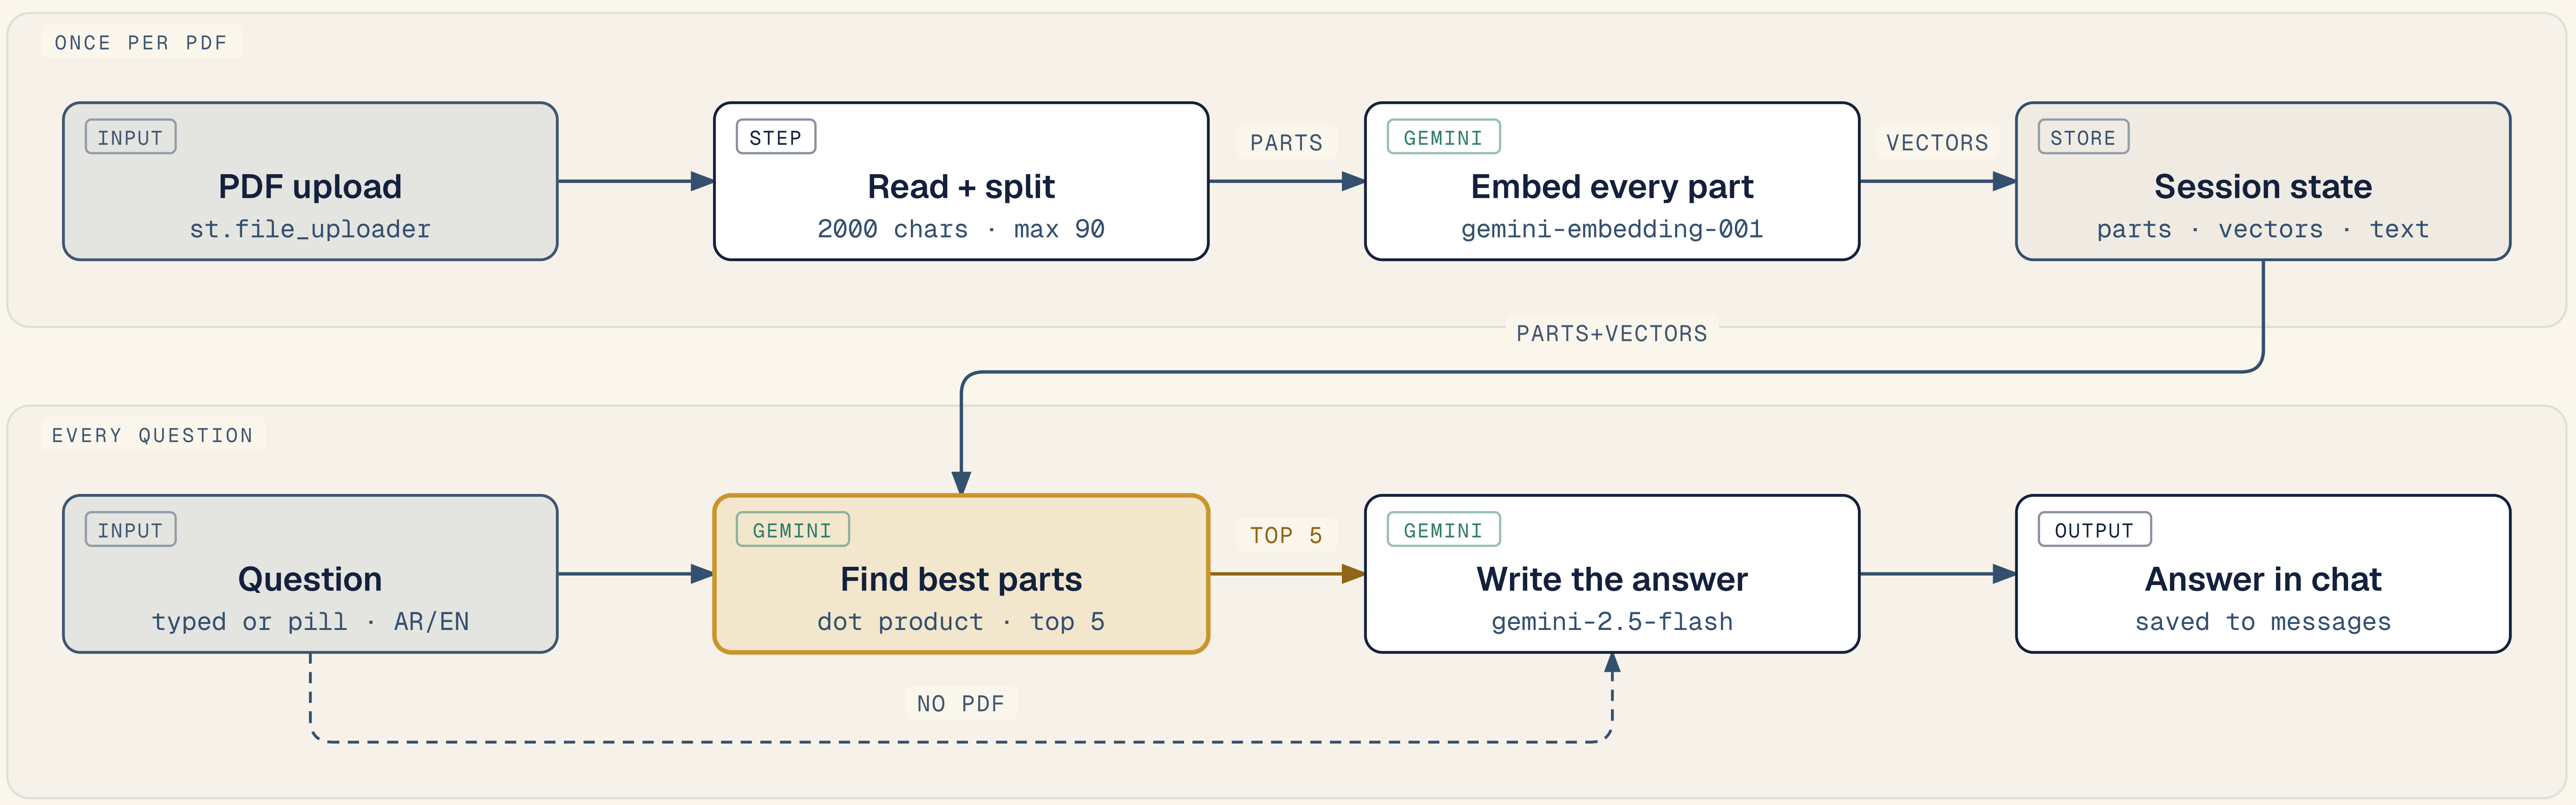
This is not legal advice.

The contract is in Arabic, the question is in English, so Ma‘at answers in English and cites articles 6 and 8. (Sample contract made for the demo.)

- **Ask in Arabic or English**
  The answer comes back in the language you asked in.
- **Answers from your document**
  Only the parts of your PDF that match the question are used.
- **Cites the articles**
  Answers point to the article numbers so you can check them.
- **One-click questions**
  “What are my rights?”, “Any deadlines?”, “Any penalties?”
- **Summarize everything**
  A plain-language summary of rights, duties, deadlines and penalties.
- **Saved chats**
  Every conversation is kept for your account.

03 · HOW Simple RAG, simple code.

How a question gets answered



ONCE PER PDF

INPUT **PDF upload** `st.file_uploader` → STEP **Read + split** `2000 chars · max 90` → PARTS → GEMINI **Embed every part** `gemini-embedding-001` → VECTORS → STORE **Session state** `parts · vectors · text`

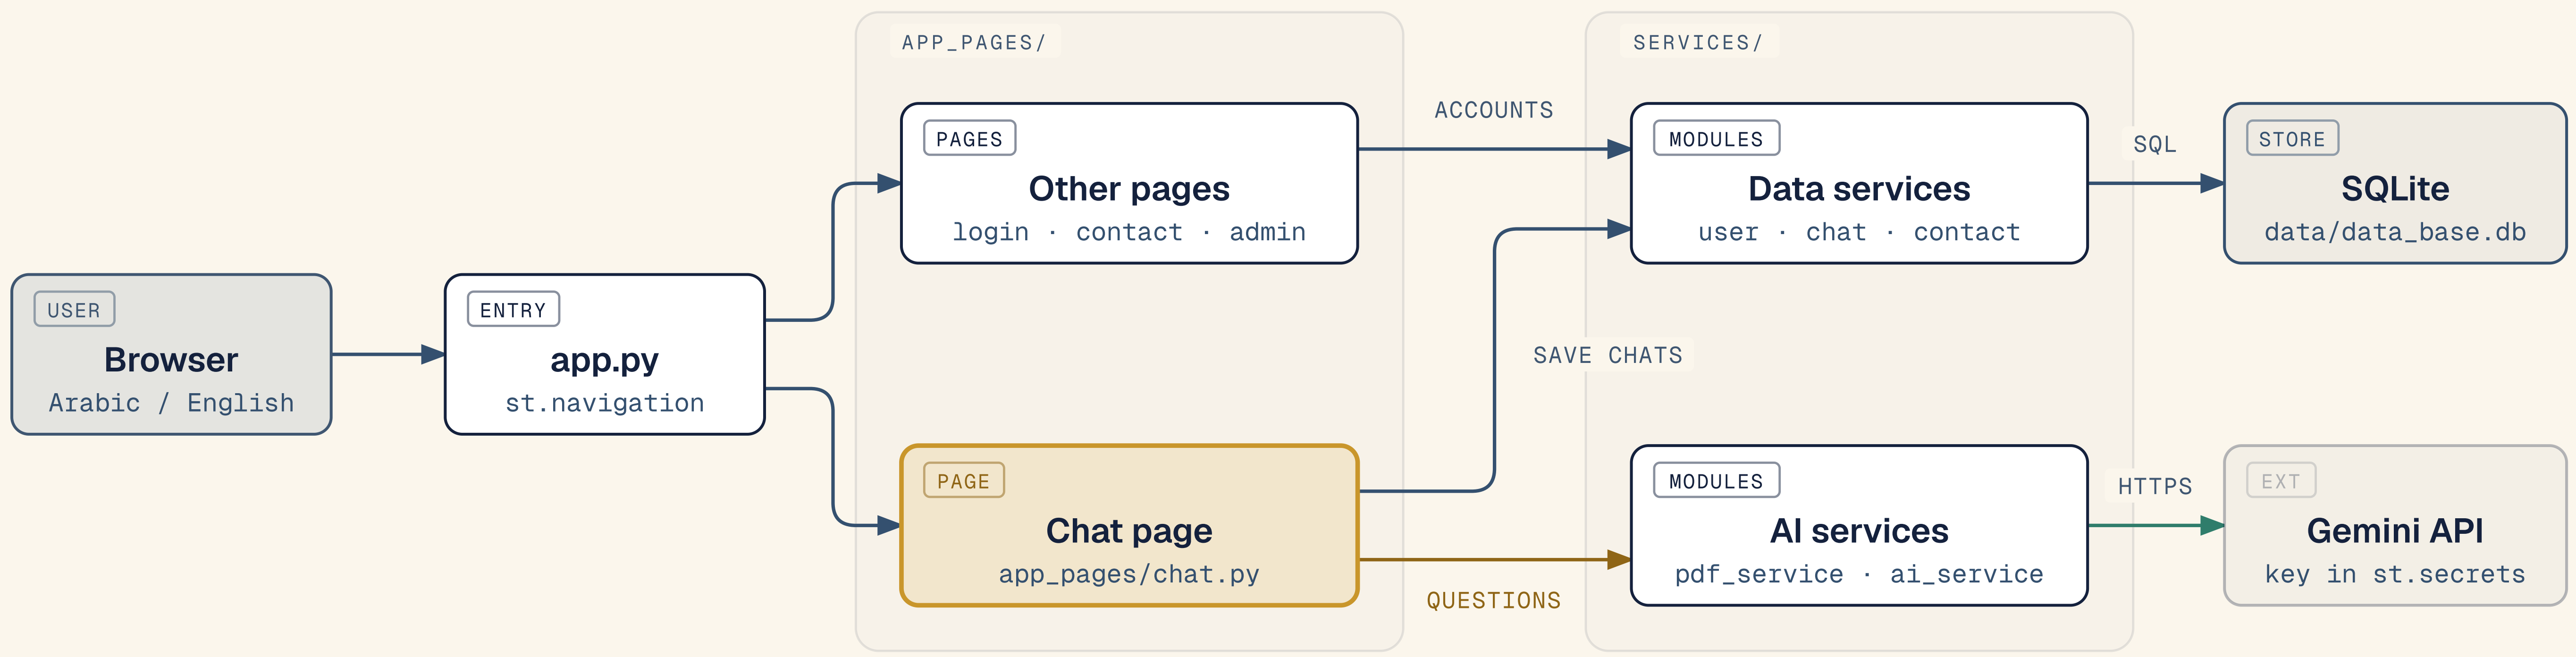
PARTS+VECTORS

EVERY QUESTION

INPUT **Question** `typed or pill · AR/EN` → GEMINI **Find best parts** `dot product · top 5` → TOP 5 → GEMINI **Write the answer** `gemini-2.5-flash` → OUTPUT **Answer in chat** `saved to messages`

NO PDF

How the app is built



USER **Browser** Arabic / English → ENTRY **app.py** `st.navigation`

APP_PAGES/

PAGES **Other pages** `login · contact · admin`

PAGE **Chat page** `app_pages/chat.py`

ACCOUNTS

SAVE CHATS

QUESTIONS

SERVICES/

MODULES **Data services** `user · chat · contact` → SQL → STORE **SQLite** `data/data_base.db`

MODULES **AI services** `pdf_service · ai_service` → HTTPS → EXT **Gemini API** `key in st.secrets`

BUILT WITH

`Python` `Streamlit` `Google Gemini` `SQLite` `pypdf`
